(All amounts are expressed in RSD 000, unless otherwise indicated)

**NOTES TO THE FINANCIAL STATEMENTS
DECEMBER 31, 2025**

(All amounts are expressed in RSD 000, unless otherwise indicated)

1. General information

Fintel Energija A.D. (hereinafter referred to as the "Company" or "Fintel Energija") is the leading independent producer of electricity from renewable sources in the Republic of Serbia. Fintel Energija's subsidiaries are pioneers in the field of electricity production from renewable sources, being the first companies to complete the construction and operate wind farms in Serbia.

The Company was founded on June 27, 2007 as a closed joint stock company under the name "Privredno društvo za proizvodnju električne energije Fintel Energija a.d. Beograd" ("Electricity Production Company Fintel Energija ad Belgrade"), by "Fintel Energia Group S.P.A." (registration number 02658620402) which is also the sole shareholder of the Company ("Owner"). "Fintel Energia Group S.P.A." is 86.22% owned by Hopafi Srl ("Ultimate Owner").

The headoffice of "Fintel Energija" is located at Masarikova Street No. 5, Belgrade, Serbia.

As of December 31, 2025, the Company has subscribed and paid-in share capital in the amount of RSD 4,057 thousand, consisting of 26,510,506 ordinary shares with an individual nominal value of RSD 0.153.

The Company's shares are traded on an organized market – the Belgrade Stock Exchange. The stock symbol is FINT, and the ISIN number is RSFINNEE60549. The Company's market capitalization as of December 31, 2025 is RSD 17,762,039 thousand (unit price per share is RSD 670).

Fintel Energia Group S.P.A., the majority shareholder of the Company, is a joint-stock company established in accordance with the law in force in the Republic of Italy, and is a vertically integrated operator in the energy supply chain, whose business is the sale of electricity and natural gas in Italy, as well as the development and exploitation of renewable energy sources (solar energy and wind energy) in Italy and Serbia.

The submitted separate financial statements for the period ended December 31, 2025 were approved for issue by the Company's directors on April 28, 2026.

On December 31, 2025, the Company had 14 employees (2024: 14 employees).

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies

The principal accounting policies applied in the drafting of these financial statements are presented below. These policies have been consistently applied to all presented years, unless otherwise indicated.

2.1. Basis for drafting and presentation of individual financial statements

The Company keeps records and prepares financial statements in accordance with the Accounting Law of the Republic of Serbia ("Official Gazette of the Republic of Serbia", No. 73/2019 I 44/2021) and other applicable legal regulations in the Republic of Serbia.

Pursuant to the Accounting Act, large legal entities, legal entities that have the obligation to prepare consolidated financial statements (parent legal entities), public companies, i.e. companies that are preparing to become public pursuant to the Capital Market Act of the Republic of Serbia, regardless of size, for the recognition, valuation, presentation and disclosure of positions in financial reports, they apply the International Financial Reporting Standards (IFRS), whose translation into Serbian was published by the Ministry in charge of financial affairs.

International Financial Reporting Standards published in Serbian by the Ministry of Finance include the Conceptual Framework for Financial Reporting, International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board, as well as interpretations of standards issued by the Accounting Standards Interpretations Committee, but do not include bases for conclusions, illustrative examples, application guidance, commentaries, dissenting opinions, or other supporting materials except in cases where they are explicitly included as an integral part of the standard or interpretation.

IAS, IFRS and interpretations published by the Board for International Accounting Standards and the Committee for Interpretations of Accounting Standards were officially translated by the decision of the Ministry of Finance of the Republic of Serbia on determining the translation of International Financial Reporting Standards (Decision number 401-00-4980/2019-16) and published in Official Gazette of the Republic of Serbia No. 92 of November 21, 2019 and are applied when preparing consolidated financial statements for annual periods ending on December 31, 2020 or after that date.

New or amended IFRS and interpretations adopted by the decision of the Ministry of Finance of the Republic of Serbia on determining the translation of International Financial Reporting Standards published in the Official Gazette of the Republic of Serbia No. 123/2020 on October 13, 2021 are applied when preparing financial statements for annual periods ending on or after December 31, 2021.

In addition, the attached financial statements have been prepared in accordance with the requirements of the Rules on the Chart of Accounts and the Content of Accounts in the Chart of Accounts for Companies, Cooperatives and Entrepreneurs (Official Gazette of the Republic of Serbia No. 89/2020) and the Rules on the Content and Form of Financial Statement Forms for Companies, Cooperatives and Entrepreneurs (Official Gazette of the Republic of Serbia No. 89/2020).

The aforementioned regulations governing the presentation of financial statements have precedence over the requirements defined in this regard by IFRS, which are published by the Ministry of Finance.

Due to the above deviations, these financial statements are not in accordance with IFRS.

(All amounts are expressed in RSD 000, unless otherwise indicated)

3. Overview of significant accounting policies (continued)

2.1. Basis for drafting and presentation of individual financial statements (continued)

The accompanying financial statements represent individual financial statements that include receivables, liabilities, operating results, changes in other comprehensive income, changes in equity and cash flows of the Company. The Company has prepared these individual financial statements in accordance with the deadlines prescribed by the Accounting Law of the Republic of Serbia. The Company also prepares consolidated financial statements for the Company and its related parties (the Group) with the prescribed deadline for issuance by April 30, 2026. Users of these financial statements should view them together with the consolidated financial statements of the Group as at and for the year ended December 31, 2025, for the purpose of obtaining complete information about the financial position, operating results and changes in the financial position of the Group as a whole. The method of recognition of investments in equity of subsidiaries is disclosed in note 3, and details of investments in subsidiaries are disclosed in note 8.

The preparation of financial statements pursuant to the Accounting Law of the Republic of Serbia requires the application of certain critical accounting estimates. It also requires management to exercise its judgment in applying the Company's accounting policies. Areas that require a higher degree of judgment or greater complexity, or areas where assumptions and estimates are material to the financial statements, are disclosed in Note 3.

2.2. Accounting basis

These financial statements have been prepared under the historical cost principle, unless the application of fair value is specifically stated. The financial statements are presented in of the Republic of Serbia ("RSD"), which is also the functional currency of the Company, and all reported numerical values are expressed in thousands of dinars (RSD'000), unless otherwise stated. The principal accounting policies applied in the preparation of these financial statements are disclosed in Note 2.4.

Comparative data are presented in the financial statements for the year ended December 31, 2024.

The financial statements have been prepared in accordance of the going concern concept, which implies that the Company shall continue to operate indefinitely period of time for the foreseeable future. In order to determine the validity of this assumption, management analyzes future cash flow projections. Based on the aforementioned analysis, management believes that the Company is capable to continue its business activities in accordance with the going concern principle and that this principle should be applied in the preparation of these financial statements.

2.3. Foreign currency conversion

Functional and display currency

Items included in the Group's financial statements are measured and presented in thousand of dinars (RSD). The dinar is the official reporting currency in the Republic of Serbia.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates ruling at the date of the transaction or at the date of the valuation if the items have been remeasured. Exchange gains and losses arising from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at the year-end are recognised in the income statement, except when they are deferred in equity as cash flow hedges and net investment hedges.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4. Significant accounting policies

Real estate, plants and equipment

Real estate, plants and equipment are stated at purchase cost less accumulated depreciation. The purchase price includes all expenses necessary to put the asset to its intended use. This value is increased by the present value of the estimated cost of land reclamation when there is a legal or construction obligation to remove the asset. The related liability is recognized as a provision for the costs of removing the asset. The accounting treatment of revised estimates of these costs, the time value of money and the discount rates are highlighted in the section on provisions for these costs.

Borrowing costs that are directly attributable to the acquisition or construction of an asset that qualifies for the attribution of borrowing costs are included in the purchase value of the mentioned asset that qualifies, i.e., one that takes a substantial period of time to prepare for planned use or sale.

Costs incurred for regular and/or periodic repairs and maintenance are recognized directly in the income statement. Costs incurred for the expansion, modernization or improvement of structural elements owned by the Company or used by third parties are capitalized to the level when they meet the conditions to be recognized as a separate asset or part of an asset.

Depreciation is calculated using the straight-line method using rates that allow the assets to be depreciated over their estimated useful life. When an asset consists of several individually identifiable assets with estimated useful lives that are significantly different from the others, depreciation of those assets is calculated separately.

Estimated useful life for each category of property, plant and equipment:

	Number of years
Construction object	40
Equipment	3-20

Impairment of property

On the date of preparation of the financial statements, an assessment is made of the existence of any indications of impairment of tangible assets. The Company's assets are stated at a value that does not exceed their recoverable amount. If there is an indication that, for the said asset, there is an impairment, the recoverable amount of that asset is estimated in order to determine the amount of the impairment. The booking amount is reduced to the recoverable amount, and the difference is recognized as an expense (loss on impairment of assets) charged to the income statement in the period in which the impairment occurred. The impairment loss is reversed if the circumstances that affected the impairment have changed.

Leasing

When applying IFRS 16 to leases, the Company recognizes assets representing the right-of-use and lease liabilities in the balance sheet, which are initially measured at the present value of future lease payments, and recognizes depreciation expense on the right-of-use assets and interest expense on the lease liability in the income statement.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of Significant Accounting Policies (Continued)

2.4. Significant Accounting Policies (Continued)

Leasing (Continued)

Valuation

The lease liability is initially measured at the net present value of all future lease payments discounted at the interest rate included in the lease (the implicit interest rate). If it cannot be readily determined, the Company uses its incremental borrowing rate.

Future lease payments, which after discounting are included in the value of the lease liability, include:

- fixed payments (including variable payments that are essentially fixed) less any lease incentives received
- variable lease payments, i.e., payments that depend on market indices or rates, which are initially valued on the lease commencement date, using the market index or rate
- cost price of the call option if it is reasonably certain that the option will be exercised
- penalties for termination of the contract, if it is reasonably likely that the termination option will be exercised.

After initial recognition, the lease liability is increased by accrued interest (using the effective interest rate) and decreased by lease payments made.

Right-of-use assets are initially measured at cost, which initially consists of the value of the lease liability initially recognized, the amount of prepaid lease payments and deposits given before the lease commencement date, less any lease incentives received from the lessor and less any initial direct costs. The right-of-use asset is subsequently measured at cost less any accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter of the lease term or the useful economic life of the leased asset.

Variable payments that are not index- or rate-linked are not included in the measurement of the lease liability or right-of-use asset. Such payments are recognized as an expense in the period in which they are incurred.

Company as a lessor

The Company applies a uniform recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities for lease payments and the right-of-use, which represents the right to use fixed assets.

Right to use funds

The Company recognizes the right to use the property at the commencement date (i.e. the date the property is available for use). The right to use the property is valued at cost, less accumulated depreciation and impairment losses, and adjusted for any subsequent value of the lease liability. The cost of the right to use the property includes the amount of the lease liability recognized, initial direct costs and lease payments made on or before the commencement date, less any lease incentives received.

The right to use the property is depreciated proportionally over the shorter of the lease term or the estimated useful life of the property.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4. Significant Accounting Policies (continued)

Leasing (continued)

Leasing liabilities

On the lease commencement date, the Company recognizes lease liabilities, valued at the present value of the lease payments to be made over the lease term. Lease payments include fixed payments, net of any lease incentive receivables, variable lease payments that are index- or rate-linked, and amounts expected to be paid for the residual value. Lease payments also include the exercise price of a purchase option that is reasonably expected to be exercised by the Company and the payment of a termination penalty, if the termination option is exercisable by the Company during the term of the lease agreement.

Variable lease payments that are not index- or rate-linked are recognized as expenses (unless incurred for the production of inventories) in the period in which the events or conditions giving rise to the payment occur.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the inception date because the implicit interest rate for the lease is not readily determinable. After the inception date, the amount of the lease liability is increased by accrued interest for the past period and decreased by lease payments made. In addition, the carrying amount of the lease liability is remeasured if there is a modification to the contract, a change in the lease term, a change in the lease payments (e.g., changes in future payments resulting from a change in the index or rate used to determine such lease payments) or a change in the valuation of the purchase option of the fixed asset that is the subject of the lease.

Short-term leases and leases of low-value assets

The Company applies an exemption from short-term lease recognition for its short-term leases of machinery and equipment (i.e. those leases that have a term of less than 12 months from the commencement date and that do not include a purchase option). Lease payments for short-term leases and leases of low-value assets are recognized as an expense, proportionally over the lease term.

The Company as a Lessor

Leasing is classified as operating when the contract stipulates that not all the risks and rewards incidental to ownership of the asset are transferred to the lessee.

All payments during the year under operating leases, which relate to the supply of services and goods that do not have a one-time effect, are accrued on a straight-line basis and recorded as an expense in the income statement over the lease term.

The company as beneficiary of the lease

Assets held under finance lease agreements are initially recognised as assets of the company at the present value of the minimum lease payments determined at the beginning of the lease term. The corresponding liability to the lessor is included in the balance sheet as a liability under a finance lease.

Lease installment payments are distributed between financial expenses and reductions in lease liabilities with the aim of achieving a constant rate of participation in the outstanding amount.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Financial instruments

Financial assets and financial liabilities are recorded in the Company's balance sheet from the moment the Company becomes contractually bound to the instrument. Purchases or sales of financial assets are recognized using the settlement date method, which is the date when the asset is delivered to the other party.

Financial assets are derecognized when the Company loses control of the contractual rights to those instruments, which occurs when the rights to use the instruments are exercised, expired, abandoned or assigned. A financial liability is derecognized when the obligation stipulated in the contract is discharged, cancelled or expired.

The Company has been applying IFRS 9 since January 1, 2020. Accordingly, the Company classifies its financial assets into the following categories: financial assets valued at depreciated value, financial assets valued at fair value through other comprehensive income, and financial assets valued at fair value through the income statement.

A financial asset will be valued at depreciated value if both of the following conditions are met and it is not indicated at fair value through the income statement:

- The asset is held within a business model whose objective is to hold the asset with the intention of collecting contractual cash flows, and
- The contractual terms of the asset result on given dates in cash flows that are solely payments of principal and interest on the remaining principal amount.

A financial asset shall be measured at fair value through other comprehensive income if both of the following conditions are met and it is not designated at fair value through profit or loss:

- The asset is held within a framework of a business model whose objective is achieved both through the collection of contractual cash flows and the sale of financial assets, and
- The contractual terms of the asset result on given dates in cash flows that are exclusively payments of principal and interest on the remaining principal amount.

All financial assets that are not classified as measured at depreciated cost or fair value through other comprehensive income, as described above, are measured at fair value through the income statement.

This includes financial assets held for trading and managed and whose performance is valued at fair value. In addition, upon initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be valued at depreciated cost or at fair value through other comprehensive income, at fair value through the income statement if doing so eliminates or significantly reduces an accounting inconsistency that would otherwise arise.

A financial asset is classified into one of these categories upon initial recognition.

Financial assets are reclassified only when the Company changes the business model that affects the asset, in which case all financial assets that suffer that impact are reclassified on the first day of the reporting period after the change in business model.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Business model assessment

The business model is assessed with the aim of determining whether a financial asset with only principal and interest payments is classified at depreciated cost or fair value through other comprehensive income. The business model determines whether the cash flows arise from collecting contractual cash flows, selling the financial asset, or both.

Derecognition of financial assets and financial liabilities

The Company ceases to recognize a financial asset when the contractual rights to the cash flows from the financial asset expire or when it transfers all rights to the contractual cash flows in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred, or when it neither transfers nor retains substantially all the risks and rewards of ownership and does not retain control of the transferred asset.

Any interest in such a financial asset created or retained by the Company is recognized as a separate asset or liability.

A financial asset ceases to be recognized when it is written off. A financial asset also ceases to be recognized when there is a change in the contractual terms of the financial asset that results in a significant change in the cash flows from the financial asset.

Impairment of financial assets

In accordance with IFRS 9, the Company applies a forward-looking "expected credit loss" model, which requires significant judgment regarding how changes in economic factors affect expected credit losses, which are determined on a probability-weighted basis.

The "expected credit loss" model is applied to financial assets valued at depreciated cost, contract assets and debt instruments valued at fair value through other comprehensive income, but not to investments in equity instruments.

In accordance with IFRS 9, provisions for losses shall be valued on one of the following two bases:

- 12-month expected credit losses – these are expected credit losses arising from all possible default events during the 12 months following the reporting date, and
- Expected credit losses over the life of the instrument – these are expected credit losses arising from all possible default events over the expected life of the financial instrument.

The impairment requirements in IFRS 9 are complex and require management judgment, as well as estimates and assumptions, particularly regarding the following:

- Determining whether the credit risk of a financial asset has increased significantly since initial recognition, and
- Considering the information about future circumstances when estimating expected credit losses.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Long-term financial investments

Equity investments in other listed companies are initially valued at cost. Subsequent valuation is performed at each balance sheet date to adjust their value to market value.

Long-term financial investments that include equity investments in related legal entities, commercial banks and other legal entities that are not listed on the stock exchange are stated at cost less impairment based on management's assessment in order to reduce them to their recoverable amount.

Trade receivables, short-term placements and other short-term receivables

Trade receivables, short-term placements and other short-term receivables are stated at nominal value, less any allowances made based on management's assessment of their collectability.

Cash and cash equivalents

Cash and cash equivalents include: cash on hand, demand deposits with banks or other financial institutions for current transactions, postal current accounts and other cash equivalents, as well as other investments with original maturities of up to three months.

Financial liabilities

Financial liabilities are classified in accordance with the substance of the contractual provisions. Financial liabilities are stated at nominal value, increased by interest based on concluded contracts.

Business liabilities

Trade payables and other operating liabilities are valued at their nominal value.

Provisions

Provisions are recognized when the Company has a present legal or contractual obligation as a result of past events and it is probable that an outflow of funds will be required to settle the obligation. The amount recognized represents the best estimate of the expenditure required to settle the obligation. When the time value of money is significant and the date of settlement of the obligation can be determined approximately, the provision is valued at the present value of the expenditure required to settle the obligation, using a pre-tax discount rate that reflects current market assessments of the value of money and the risks specific to the obligation. Any increase in the provision due to the passage of time is reported as interest expense.

If the provision relates to disassembly and removal, the provision is recognised as part of the asset to which it relates and the expense is recognised in the income statement as depreciation of the asset to which the expense relates.

Changes in accounting estimates are reflected in the income statement in the year in which the change occurs, except for changes in expected dismantling and removal costs due to changes in the timing and use of economic resources required to settle the obligation, or changes resulting from changes in the discount rate.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Provisions (continued)

Such changes are added to or subtracted from the book value of the asset to which they relate and are recognized in the income statement through depreciation. If changes are added to the book value of the asset, the Company makes an assessment whether the new present value will be fully compensated; if not, the present value of the asset is reduced to take into account the irrecoverable amount and a loss is recognized in the income statement.

If the changes are deducted from the carrying amount of the asset, the decrease is recognized as a reduction of the asset to the amount of its book value, any excess is recognized immediately in the income statement.

Regarding the adopted assessment criteria for determining the deactivation or recovery of assets, it is explained in the paragraph Estimates and assumptions.

Risks that may cause an increase in a contingent liability are disclosed in the contingent liabilities and risks section, but are not recognized.

A potential liability arising from a business combination is measured at the higher of the amount that would have been recognized applying the above policy for provisioning costs and the present value of the initially defined liability.

Revenue recognition

The company operates as a holding company and performs management and financing activities.

Revenue from contracts with customers is recognized when control over the expected products is transferred to the customer, or when the service is performed, in an amount that reflects the consideration to which the Company expects to be entitled in exchange for the related products/goods or services.

Revenues from the provision of services are recognized in the accounting period in which the service was provided and are reported at the invoice value minus approved discounts.

Contracts with customers define the key commercial terms on which customers place their orders. From a revenue recognition perspective, a contract is viewed as a combination of the underlying contract with customers and the orders placed.

Specifically, the revenue recognition process involves the following 5 steps:

- Step 1: Identify the contract(s) with the customer;
- Step 2: Determine performance obligations from the contract;
- Step 3: Determine the transaction price;
- Step 4: Distribute the transaction price to the performance obligations under the contract; and
- Step 5: Recognize revenue when the entity fulfills (or while fulfilling) the performance obligation.

The Company recognizes income when a performance obligation is fulfilled (or during fulfillment of that obligation), i.e., when 'control' over the goods or services underlying the specific obligation is transferred to the customer.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Financial income and expenses

Financial income consists of interest on loans, interest receivables from placed funds and positive exchange rate differences. Interest income is recognized in the income statement on an accrual basis, using the effective income method. Interest income is recognized in the income statement of the period to which it relates, in accordance with the principle of causation.

Financial expenses that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the purchase price of the asset, starting from the date the Company incurs the financial expenses until the date the financed asset is ready for use.

Dividends

Distribution of dividends to the Company's shareholders is recognized as a liability in the financial statements in the period in which the Company's shareholders approved the dividends.

Earnings per share

Basic earnings per share are calculated by dividing the profit/(loss) attributable to the Company's shareholders by the weighted average number of ordinary shares outstanding for the period.

Operating expenses

Operating expenses include general expenses such as rent, marketing, insurance, payment transactions, taxes, and other expenses incurred in the current accounting period.

Other expenses

Other expenses include losses from the sale and disposal of real estate, plant, equipment and intangible assets, losses from the sale of securities and equity interests in legal entities, losses from the sale of materials, deficits, expenses from direct write-offs of receivables, expenses from asset impairment, negative effects of value adjustments of intangible assets, real estate, plant, equipment, long-term and short-term financial investments, inventories, securities and receivables in accordance with the Company's accounting policy.

Employee benefits

a) Taxes and contributions to employee social security funds

In accordance with the regulations applicable in the Republic of Serbia, the Company is under the obligation to pay taxes and contributions to tax authorities and state funds that ensure social security of employees. These obligations include taxes and contributions for employees at the expense of the employer in amounts calculated at the rates prescribed by law. The Company is also obliged to withhold contributions from the gross salary of employees and to pay them to the funds on behalf of the employees. Taxes and contributions at the expense of the employer and taxes and contributions at the expense of the employee are recorded as expenses in the period to which they relate.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Employee benefits (continued)

b) Severance pay liabilities

In accordance with the provisions of the Labor Law, the Company is obliged to pay an employee a severance pay upon retirement in the amount of three average salaries in the Republic of Serbia, determined according to the latest published data from the republican authority responsible for statistics.

To employees whose work is no longer needed and who are not provided with any of the rights established by law, the employer shall pay severance pay in the amount of the sum of one third of the employee's salary for each completed year of work in the first 10 years of employment and one quarter of the employee's salary for each subsequent completed year of work in employment over 10 years of employment. Earnings within the meaning of the previous paragraph shall be considered the average salary of the employee paid for the last 3 months preceding the month in which the severance pay is paid.

Income tax

Current income tax

Current income tax represents the amount calculated by applying the prescribed tax rate of 15% to the base determined by the tax balance, which represents the amount of profit before tax after deducting the effects of adjusting income and expenses, in accordance with the tax regulations of the Republic of Serbia, with a reduction for prescribed tax credits.

The Law on Profit Tax of the Republic of Serbia does not provide that tax losses from the current period can be used as a basis for refunding taxes paid in previous periods. However, losses from the current period reported in the tax balance sheet can be used to reduce the tax base of future accounting periods, but not longer than five years. Tax losses incurred before January 1, 2010 can be carried forward against future profits for a period not longer than ten years.

Deferred income tax

Deferred income tax is calculated using the balance sheet liability method for temporary differences arising from differences between the tax bases of assets and liabilities and their carrying amounts. Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences and tax losses and credits that can be carried forward to future fiscal periods, to the extent that it is probable that taxable profit will be available against which the deferred tax assets can be utilized.

Deferred tax assets and liabilities are calculated at the tax rate expected to apply in the period when the asset is realized or the liability is settled. As of 31 December 2025, deferred tax assets and liabilities were calculated at a rate of 15% (December 31, 2024: 15%)

Deferred tax is charged or credited to the income statement, except when it relates to items that are charged or credited directly to equity, in which case the deferred tax is also allocated within equity.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Transactions with related legal entities

For the purposes of these financial statements, legal entities are treated as related if one legal entity has the ability to control another legal entity or exercise significant influence over the financial and operating decisions of the other entity in accordance with the provisions of IAS 24: "Related Party Disclosures".

The Company considers related legal entities in terms of the above-mentioned standard to be legal entities in which it has a share in the capital, or legal entities with a share in the capital of the Company.

Related parties may enter into transactions that unrelated parties might not, and transactions with related parties may be conducted under different terms and for different amounts than the same transactions with unrelated legal entities.

The Company provides services to related parties and is at the same time a user of their services. Relations between the Company and related parties are regulated on a contractual basis and at market conditions.

The Company has disclosed all transactions with related parties in the attached financial statements, as required by IAS 24 - "Related Party Disclosures".

3. Estimates and assumptions

The preparation of these separate financial statements requires management to apply accounting policies and methods, which in certain circumstances are based on accounting estimates and assumptions, and which may also be based on past experience and assumptions that are considered reasonable and realistic. The use of such estimates and assumptions affects the separate financial statements, including the balance sheet, income statement, statement of other financial performance and statement of cash flows, as well as the related disclosures in the notes to the separate financial statements. The actual amounts of items in the financial statements for which the aforementioned estimates and assumptions were used may differ from the amounts recognized in the financial statements due to the uncertainty of the assumptions and conditions on which the estimates are based.

Below is a brief description of the key accounting estimates used in the preparation of the individual financial statements.

Impairment of equity participation in subsidiaries

Investments in subsidiaries are tested for impairment, which, when there are indicators that indicate that it is difficult to recover the net book value, should be recognized as an impairment. Verification of the existence of the aforementioned indicators requires subjective assessments by management, based on information available to the Company, market information and based on past experience. If it is determined that potential impairment may occur, the Company's management uses a valuation technique to calculate the amount of potential impairment. The accurate identification of indicators of potential impairment, as well as the calculation of estimates for its determination, depends on factors that may change over time and that may affect the assumptions and estimates made by management.

Based on the assessments made by the Company's management, there are no indicators of impairment of the equity interest.

(All amounts are expressed in RSD 000, unless otherwise indicated)

3. Estimates and assumptions (continued)

Provisions

Other provisions for risks and compensations mainly relate to possible liabilities for fines and interest on amounts due to tax authorities. The allocation of provisions is made based on the best estimates of the costs, at the reporting date, that are likely to be incurred to settle the obligation, after seeking legal advice.

4. Financial risk management

Coordination and monitoring of key financial risks is carried out by the owner's central treasury department, which provides guidelines for managing different types of risks and for the use of financial instruments. The main features of the Company's risk management policies are:

- centrally setting operational risk management guidelines relating to market, liquidity and cash flow risks;
- monitoring of achieved results;
- diversification of commitments/obligations and product portfolio.

Credit risk

Credit risk represents exposure to potential losses arising from the failure of business and financial counterparties to meet their contractual obligations.

The maximum credit risk exposure of the Company as of December 31, 2025 and 2024 is the book value of each class of assets as indicated in the following table:

<i>RSD thousands</i>	December 31, 2025	December 31, 2024
Trade receivables	33,900	51,427
Other receivables	52,134	19,882
Long-term receivables and investments	1,478,362	1,832,523
Short-term receivables and investments	71,506	14
Active time limits	408,223	325,620
TOTAL	2,044,125	2,229,466

Trade receivables as of December 31, 2025 amounted to RSD 33,900 thousand and mostly relate to re-invoiced services related to the management fee. Re-invoicing of these services has been carried out since 2024 and relates to the management fee provided by Fintel Italy to Fintel Serbia and other related entities. In the previous year, as of December 31, 2024, trade receivables amounted to RSD 51,427 thousand.

In 2025, other receivables amount to RSD 52,134 thousand and are significantly higher compared to the previous year, when they amounted to RSD 19,882 thousand. This difference arises primarily from the fact that in 2025, dependent legal entities returned a certain part of the loans. For loans that are fully repaid, but the interest that is not, it is in the position of Other receivables.

(All amounts are expressed in RSD 000, unless otherwise indicated)

4. Financial Risk Management (continued)

Credit risk (continued)

Long-term receivables and investments relate to loans granted by Fintel Energija to related parties. In 2025, these receivables amounted to RSD 1,478,362 thousand, while in 2024 they amounted to RSD 1,832,523 thousand. Compared to the previous year, long-term receivables and investments decreased by RSD 354,161 thousand. A certain part of the loans was returned (4,125,399 EUR), but on the other hand, new loans were given to related legal entities (1,070,000 EUR).

Prepayments and accrued income consist of interest receivables from loans granted to subsidiaries. In 2025, they amounted to RSD 408,223 thousand, while in 2024 they amounted to RSD 325,620 thousand. Compared to the previous year, prepayments and accrued income increased by RSD 82,603 thousand. This increase is a direct consequence of the growth of long-term receivables and investments, i.e., an increase in the amount of loans granted to subsidiaries, which also resulted in an increase in accrued interest receivables (MK Fintel Wind ad., MK Fintel Wind Holding doo, VP Lipar doo, VP Lipar 2 doo, Project Torak doo, Fintel Energija Development doo and other subsidiaries).

According to the cash flow projections of the subsidiaries, these assets carry a low level of credit risk.

Liquidity risk

Liquidity risk is related to the ability to meet obligations arising from financial commitments undertaken by the Company. Prudent management of liquidity risk during regular activities involves maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of term loan funds.

The Company manages liquidity risk centrally, as the administration department periodically monitors the Company's net cash/debt through the preparation of appropriate cash inflow and outflow reports. In this way, the Company aims to ensure adequate coverage for financing needs, by precisely monitoring financing, open credit lines and their use, all with the aim of optimizing its resources and managing temporary liquidity surplus.

The Company's objective is to establish a financing structure that, in accordance with its business objectives, guarantees sufficient liquidity for the Company, minimizes opportunity costs and maintains a balance in terms of maturity and debt composition.

The following table presents an analysis of the maturity of liabilities as of December 31, 2025 and 2024. The different maturities are determined based on the period between the reporting date and the contractual maturity of the Company's liabilities, gross of accrued interest as of 31 December. Interest is calculated in accordance with the contractual terms of the financing.

<i>RSD thousands</i>	December 31, 2025			
	Less than a year	1-2 years	2-5 years	Over 5 years
Financial liabilities to shareholders	3,704		1,074,625	-
Liabilities for loans to banks	-			-
Liabilities to suppliers	12,751			-
Other obligations	322,561			-
Total	339,016	-	1,074,625	-

(All amounts are expressed in RSD 000, unless otherwise indicated)

4. Financial Risk Management (continued)

Liquidity risk (continued)

<i>RSD thousands</i>	December 31, 2024			
	Less than a year	1-2 years	2-5 years	Over 5 years
Financial liabilities to shareholders	13,745	-	1,072,178	-
Liabilities for loans to banks	-	-	-	-
Liabilities to suppliers	34,119	-	-	-
Other liabilities	281,085	-	-	-
Total	329,679	-	1,072,178	-

Market risk

In performing its business, the Company is potentially exposed to the following market risks:

- the risk of exchange rate fluctuations;
- the risk of interest rate fluctuations.

These risks are essentially centrally managed by the parent company Fintel Energija.

Risk of exchange rate fluctuations

Foreign exchange risk is associated with operations in currencies other than RSD. The Company is exposed to foreign exchange rate fluctuations, as it conducts business in Serbia through its subsidiaries, which are companies dedicated to the study, construction, development and management of wind farms and other renewable energy projects. The impact is presented in the balance sheet and income statement of subsidiaries.

By performing an accounting sensitivity analysis as of December 31, 2025, if the currency had strengthened/weakened by 5% against the EUR and all other variables remained constant, the result after tax would have been RSD 45,829 thousand (2024: RSD 46,152 thousand) higher/lower, mainly as a result of positive and negative exchange rate differences due to the exchange rate of liabilities denominated in EUR.

Risk of interest rate fluctuations

The Company is exposed to interest rate risk arising from its financial liabilities. Fixed-rate debt exposes the Company to the risk of changes in the fair value of the debt that are related to changes in market reference rates. Variable-rate debt exposes the Company to cash flow risk arising from interest rate volatility.

The Company's financial indebtedness consists of current debt to the parent company, where the interest rate is fixed.

As a result of the aforementioned hedging transactions, the impact of expected changes in interest rates over the next twelve months is considered negligible in the context of the Company's financial statements.

(All amounts are expressed in RSD 000, unless otherwise indicated)

4. Financial Risk Management (continued)

Market risk (continued)

Capital management risk

The Company's goal in terms of capital risk management is to preserve business continuity in order to guarantee returns to shareholders and benefits to other stakeholders. Furthermore, the Company aims to maintain an optimal capital structure in order to reduce borrowing costs.

The Company monitors its capital based on the ratio of net debt to net invested capital (gearing ratio). Net debt is calculated as total debt, including current and long-term loans and borrowings, plus net exposure to banks. Net invested capital is calculated as the sum of total capital and net debt.

The debt ratio as at December 31, 2025 and 2024 is presented in the following table:

<i>RSD thousands</i>	31.12.2025	31.12.2024
<i>Long-term financial liabilities:</i>		
- Bank loans	-	-
<i>Short-term financial liabilities:</i>		
- Financial liabilities to shareholders	1,078,329	1,085,923
Cash and cash equivalents	(378,085)	(119,695)
Net debt (A)	700,244	966,228
Capital (B)	1,027,749	963,919
Net capital employed (C=A+B)	1,727,993	1,930,147
Debt ratio (A/C)	40.5%	50.1%

(All amounts are expressed in RSD 000, unless otherwise indicated)

5. Financial assets and liabilities by class

The following table shows the Company's financial assets and liabilities by class, with an indication of the corresponding fair value, as at December 31, 2025 and 2024:

RSD thousands	December 31, 2025				
	Depreciated cost	Fair value through other income	Fair value through profit or loss	Hedge accounting	Total
Financial assets	1,478,362	-	-	-	1,478,362

Loans	-	-	-	-	-
Financial liabilities towards the parent legal entity	1,085,923	-	-	-	1,085,923
Operations liabilities	34,119	-	-	-	34,119
Other short-term liabilities	281,806	-	-	-	281,806
Total	1,357,678	-	-	-	1,357,678

6. IFRS 8: Segment information

Based on the fact that the Company operates only in the renewable energy sector and in Serbia, there is only one reporting segment.

(All amounts are expressed in RSD 000, unless otherwise indicated)

7. Information on guarantees assumed, actual and other contingent liabilities

a) Guarantees issued

No guarantees were issued.

b) Other

There were no other potential liabilities of the Company.

8. Participations in the capital of dependent legal entities

Direct investments in related companies are presented below:

- RSD 16,009 thousand refers to 54% ownership in MK-Fintel Wind AD (RSD 16,009 thousand as at December 31, 2024).
- RSD 5 thousand refers to 54% ownership in MK-Fintel Wind Holding Doo (RSD 5 thousand as at December 31, 2024).
- RSD 200 for 100% ownership in Fintel Energija Development Doo (RSD 200 on December 31, 2024).

In 2025, the Company, as the parent legal entity of the business group, had a share in the capital of the following dependent legal entities:

Name	Share capital (RSD '000)	Head office	31/12/2025 % participation	31/12/2024 % participation	
MK-Fintel Wind ad	29,647	Belgrade (Serbia)	54%	54%	Directly

Staklenik Šest d.o.o.	0	Belgrade (Serbia)	100%	100%	Indirectly

(All amounts are expressed in RSD 000, unless otherwise indicated)

9. Long-term loans and placements – parent and subsidiary legal entities

Long-term financial liabilities – parent and subsidiaries amount to RSD 1,478,362 thousand (2024: RSD 1,832,523 thousand) and relate to financing provided to subsidiaries and other related entities, as set out in the tables below:

Loan beneficiary	Amount 31.12.2025 EUR	Amount 31.12.2025 RSD	Amount 31.12.2025 RSD	Maturity
MK Fintel Wind ad	7,123,847	835,499	1,212,706	2036
MK Fintel Wind Holding d.o.o.	847,407	99,386	202,783	2030
MK-Fintel Wind Development d.o.o.	84,200	9,875	5,055	2030
Maestralski Ring d.o.o.	250,000	29,321	5,851	2030
VP Lipar d.o.o.	1,992,000	233,626	188,628	2038
VP Lipar 2 d.o.o.	1,904,000	223,305	183,011	2038
Project Torak d.o.o.	83,500	9,793	8,893	2030
Fintel Energija Development d.o.o.	191,440	22,452	21,114	2030
Staklenik 1 d.o.o.	44,000	5,160	585	2030
Staklenik 2 d.o.o.	27,600	3,237	819	2030
Staklenik 3 d.o.o.	13,200	1,548	878	2030
Staklenik 4 d.o.o.	11,000	1,290	585	2030
Staklenik 5 d.o.o.	10,800	1,267	503	2030
Staklenik 6 d.o.o.	9,500	1,114	410	2030
Viafast d.o.o.	10,700	1,255	468	2030
Balkan-electro d.o.o.	2,000	235	234	2027
Total	12,605,194	1,478,363	1,832,523	

Long-term financial placements were made to subsidiaries and other related parties. The given placements bear an arm's length interest rate, which in 2025 amounts to 6.79%.

Long-term financial investments refer to loans that Fintel Energija provides to subsidiaries and other related parties. In 2025, these receivables amount to 1,478,362 thousand RSD, while in 2024 they amounted to 1,832,523 thousand RSD. Compared to the previous year, long-term receivables and investments decreased by 3,055,399 EUR (returned part of the loans in the amount of 4,125,399 EUR and new loans were granted in the amount of 1,070,000 EUR). These funds are used for project development, enabling the financing and implementation of new investments in the renewable energy sector.

The Company has no significant loan credit losses related to the aforementioned placements and loans.

(All amounts are expressed in RSD 000, unless otherwise indicated)

10. Trade receivables

Trade receivables as of December 31, 2025 and 2024 amount to:

<i>RSD thousands</i>	December 31, 2025.	December 31, 2024.
Receivables from customers in the country	16,587	6,981
Receivables from the parent company, subsidiaries and other related parties in the country	17,313	44,446
Trade receivables	33,900	51,427

Trade receivables relate to re-invoiced services related to the management fee. The re-invoicing of these services has been carried out since 2024 and relates to the management fee provided by Fintel Italy to Fintel Srbija and other related entities.

This re-invoicing model was introduced to more accurately reflect project management costs and obligations within related legal entities.

11. Cash and cash equivalents

Cash and cash equivalents as of December 31, 2025 and 2024 are:

<i>RSD thousands</i>	December 31, 2025.	December 31, 2024.
Current account		
- in dinars	378,045	119,655
- in foreign currency	40	40
Cash and cash equivalents	378,085	119,695

The market value of cash and cash equivalents matches its book value.

For the purpose of preparing the statement of cash flows, investments and financing transactions that did not require the use of cash or cash equivalents are excluded.

12. Other short-term assets

Other short-term assets in the amount of RSD 52,134 thousand as of December 31, 2025 (RSD 19,882 thousand as of December 31, 2024) are presented in more detail in the following table:

<i>RSD thousands</i>	December 31, 2025	December 31, 2024
Other receivables	47,901	15,648
Claims for overpaid income tax	4,224	4,224
Receivables for prepaid other taxes and contributions	9	10
Total	52,134	19,882

(All amounts are expressed in RSD 000, unless otherwise indicated)

12. Other short-term assets (continued)

In 2025, other receivables amount to RSD 52,134 thousand and are significantly higher compared to the previous year, when they amounted to RSD 19,882,000 thousand. This difference arises primarily from the fact that in 2025 subsidiaries returned certain part of loans. For loans which were completely returned while interest was not, it is in the position of Other receivables.

13. Short-term active accruals

Short-term active accruals and deferred income as of 31 December 2025 amounted to RSD 408,223 thousand (RSD 325,620 thousand as of 31 December 2024). The majority of accrued income and deferred income relates to accrued but unpaid interest on loans granted to subsidiaries and other subsidiaries and other related entities. These receivables represent income that shall be realized in future accounting periods, in accordance with the agreed financing terms.

14. Equity

Equity as of December 31, 2025 and 2024 is presented in the table below:

Balance as at 31.12.2025.	4,057	681,237	342,455	-	1,027,749

(All amounts are expressed in RSD 000, unless otherwise indicated)

14. Equity (continued)

Share capital

As of December 31, 2025, the paid-up subscribed share capital of the Company amounted to RSD 4,057 thousand (RSD 4,057 thousand as of December 31, 2024) thousand, consisting of 26,510,506 ordinary shares of RSD 0.153 each.

Share premium

As of December 31, 2025, reserves include the share premium generated by the capital increase related to the initial public offering of the Company's shares, the Premium segment of the Belgrade Stock Exchange. The share premium amounts to RSD 755,022 thousand (equivalent to RSD 499,847 per each new share issued by the Company). The value of the share premium is stated net of IPO-related expenses. IPO expenses amounted to RSD 73,785 thousand.

Retained earnings / (losses)

They consist of gains / (losses) of previous years. They also include net profit / (loss) for the current year.

15. Long-term and short-term loans from the parent and related entities

Loans from the parent and related legal entities in the amount of RSD 1,078,329 thousand as of 31 December 2025 (RSD 1,085,923 thousand as of 31 December 2024), mostly consist of revokable loans that shall be repaid to the owner Fintel Energia Group SpA. Long-term loans in the amount of EUR 9,162,747 are interest-bearing, the interest rate is from 3% to 6%. Other loans are interest-free. In the course of 2025, short-term, interest-free loans to the parent company were repaid, in the amount of EUR 28,600.

16. Operations liabilities

As of December 31, 2025, operating liabilities amounted to RSD 12,751 thousand, which is approximately the same level as in the previous year (RSD 34,119 thousand as of December 31, 2024). The largest part of these liabilities relates liabilities to suppliers in the country and the parent company abroad.

17. Other short-term liabilities

As of December 31, 2025, other short-term liabilities amounted to RSD 2,308 thousand, which represents an increase compared to the previous year, when they amounted to RSD 3,240 thousand. The largest part of these liabilities, in the amount of RSD 2,249 thousand, relates to VAT liabilities.

18. Passive time accruals

As of December 31, 2025, short-term accrued expenses amounted to RSD 320,253 thousand, an increase compared to the previous year, when they amounted to RSD 278,565 thousand. The largest part of these liabilities, amounting to RSD 317,266 thousand, relates to accrued interest on loans received from the parent company Fintel Energia Group SpA.

The remaining amount of RSD 2,987 thousand refers to reserved audit and consulting services costs related to the business year 2025, but for which invoices are expected to be issued in 2026.

(All amounts are expressed in RSD 000, unless otherwise indicated)

INCOME STATEMENT

19. Revenue from sales of products and services

Sales revenues for the twelve-month period ended December 31, 2025 amounted to RSD 52,422 thousand, while as of December 31, 2024 they amounted to RSD 13,938 thousand. Significant revenue growth in 2025 is the result of the introduction of re-invoicing of project management services (management fee), while in the previous year revenues arose exclusively from the provision of accounting services. In the current year, Fintel Group started intensive project development.

20. Salary costs

Salary expenses for the period of twelve months ended on December 31, 2025 and 2024 are presented in the following table:

	2025	2024
Salary costs and salary compensation	7,212	8,608
Costs of taxes and contributions on earnings and earnings compensation	1,093	1,304
Other personal expenses and fees	1,142	1,350
Total	9,447	11,262

21. Intangible costs

Intangible costs for the twelve-month period ended on December 31, 2025 amount to RSD 58,249 thousand, which represents a significant increase compared to the previous year, when on December 31, 2024 they amounted to RSD 19,543 thousand. These costs relate to bookkeeping services and services provided by the parent company under services agreement (invoices issued in accordance with the Consulting Services Agreement).

22. Financial income

Finance income for the twelve-month period ended 31 December 2025 and 2024 is presented in the following table:

	2025	2024
Financial income from relations with parent, subsidiary and other legal entities	119,830	330,551
Interest income	5	-
Positive exchange rate differences and positive effects of the currency clause	62	1,149
Total	119,897	331,700

Financial income for the period ending on December 31, 2025 is significantly lower compared to the same period last year. In 2025, the Company did not realize income based on dividends, but instead of dividends, part of the loans were returned by dependent legal entities. The lack of income before dividends had the greatest impact on the overall result, that is, on its decline.

(All amounts are expressed in RSD 000, unless otherwise indicated)

23. Financial expenses

Finance expenses for the twelve-month period ended 31 December 2025 and 2024 are presented in the following table:

	2025	2024
Financial expenses from relations with parent, subsidiary and other legal entities	45,100	43,930
Interest expenses	-	87
Negative exchange rate differences and negative effects of the currency clause	243	2
Other financial expenses	-	102
Total	45,343	44,121

24. Tax expense for the period

The Company had no tax expense for the year ended 31 December 2025 and the year of 2024.

Year in which the loss was reported in the tax balance of the named year	Reported in the tax balance of the named year	Used in previous years	Used in the current year	Loss of rights at the end of the current year	It remains to be used for years to come
3	4	5	6	7	8
2019.	73,883,352	53,782,835		20,100,517	-
2020.	57,205,429		5,205,429		-
2021.	31,067,514		6,628,053		24,439,461
2022.	34,301,091				34,301,091
2023.	18,251,808				18,251,808
2024.					-
	214,709,194	53,782,835	63,833,482	20,100,517	76,992,360

25. Basic earnings/(loss) per share

Basic earnings per share ranged from earnings of RSD 10.41 for the twelve-month period ended December 31, 2024 to earnings per share of RSD 2.41 for the period ended December 31, 2025. Basic earnings per share were calculated by dividing the Company's net result by the average number of shares of Fintel Energija (average number of shares is 26,511 thousand).

Diluted earnings per share equals basic earnings per share on both dates.

(All amounts are expressed in RSD 000, unless otherwise indicated)

26. Transactions with related parties

As previously indicated, the majority shareholder of the Company is Fintel Energia Group SpA.

Below is an overview of the Company's transactions with related parties in 2025 and 2024. All transactions with related parties were carried out on market terms.

As of December 31, 2025 and December 31, 2024, an overview of the amounts of receivables and liabilities arising from transactions with related parties is presented in the table below:

December 31, 2025.				
<i>RSD thousands</i>	Parent company	Dependent and affiliated companies owner	Subsidiaries	Total
Accounts receivable	-	-	17,313	17,313
Long-term loans	-	-	1,478,362	1,478,362

Key management compensation

The members of the Board of Directors were paid remuneration in the gross amount of RSD 1,365 thousand during 2025. Tiziano Giovannetti is the sole executive director of Fintel Energija AD Beograd and its subsidiaries.

27. Tax risk

The tax laws of the Republic of Serbia are often interpreted differently and are subject to frequent changes. The interpretation of tax laws by tax authorities in relation to the Company's transactions and activities may differ from the interpretation of management. As a result, transactions may be challenged by tax authorities and the Company may be assessed additional taxes, penalties and interest. The limitation period for tax liabilities is five years. This practically means that tax authorities have the right to determine the payment of outstanding liabilities within five years from the date the liability arose. Management estimated that the Group had paid all tax liabilities as of December 31, 2025.

(All amounts are expressed in RSD 000, unless otherwise indicated)

28. Events after the balance sheet date

There were no events occurring after the balance sheet date that would require adjustment to the financial statements as of December 31, 2025, or disclosure in the Notes to the Company's financial statements.

*This is English translation of the Report
originally issued in Serbian language
(For management purposes only)*

INDEPENDENT AUDITORS' REPORT

TO SHAREHOLDERS OF FINTEL ENERGIJA AD, BEOGRAD

Opinion

We have audited the accompanying financial statements of **FINTEL ENERGIJA AD, BEOGRAD** (hereinafter: the Company), which comprise the balance sheet as at **31 December 2025**, and the income statement, statement of other comprehensive income, statement of changes in equity and cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory notes.

In our opinion, the financial statements give a true and fair view of the financial position of the Company as at 31 December 2025, and of its financial performance and its cash flows for the year then ended in accordance with the Accounting Law and other accounting regulations in the Republic of Serbia.

Basis for Opinion

We conducted our audit in accordance with Standards on Auditing applicable in the Republic of Serbia. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in the Republic of Serbia, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For the matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to this matter. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matter below, provide the basis for our audit opinion on the accompanying financial statements.

Shape the future
with confidence

Key audit matters (continued)

Recoverability of long-term loans given to related parties.

The gross balance of long-term loans given to related parties' as of 31 December 2025 amounted to RSD 1,478,363 thousand and corresponding accrued interest on such loans amounted to RSD 408,223 thousand. Long-term loans given to related parties comprise 77% of the Company's total assets. The assessment of the impairment of loans given to related parties' requires significant management judgment in assessing the related parties' ability to pay, which in turn impacts the recoverability of the majority of the Company's assets.

In assessing the recoverability of long-term loans given to related parties, management exercised significant judgements to evaluate the collectability from individual related parties, after considering their financial position and expected future results and cash flows.

Considering materiality of the amounts involved, as well as the fact that this area requires a significant level of management judgement, recoverability of loans given to related parties was determined to be a key audit matter in our audit of the Company's financial statements.

Our audit procedures included considering the appropriateness of accounting policies, evaluation of the loan impairment methodologies at the financial statement level, and their comparison to the requirements of IFRS 9, Financial Instruments and the Accounting Law and other accounting regulations in the Republic of Serbia.

We inspected relevant contracts with the related parties and assessed their creditworthiness with reference to available information, where applicable.

We evaluated management's process for identifying impairment indicators, based on IFRS 9, *Financial instruments* and the Accounting Law and other accounting regulations in the Republic of Serbia. and related parties' specific factors, if any.

We assessed the appropriateness of disclosures in relation to long-term loans given to related parties' included in the Note 9 of the accompanying financial statements prepared in accordance with the Accounting Law and other accounting regulations in the Republic of Serbia. and IFRS 9, Financial Instruments.

Other matter

The accompanying financial statements represent the Company's separate financial statements. Consolidated financial statements of the Group of which the Company is a parent, and which reflect the Group's overall financial position as at 31 December 2025, will be issued separately.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the Accounting Law and other accounting regulations in the Republic of Serbia, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Shape the future
with confidence

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standards on Auditing applicable in the Republic of Serbia will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Standards on Auditing applicable in the Republic of Serbia, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify the opinion. The auditor's conclusions are based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause an entity to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

Shape the future
with confidence

Auditors' responsibilities for the audit of the financial statements (continued)

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The partner in charge of the audit resulting in this independent auditor's report is Danijela Mirkovic.

 Biljor Bogdanov

(All amounts are expressed in RSD 000, unless otherwise indicated)

**NOTES TO THE FINANCIAL STATEMENTS
DECEMBER 31, 2025**

(All amounts are expressed in RSD 000, unless otherwise indicated)

1. General information

Fintel Energija A.D. (hereinafter referred to as the "Company" or "Fintel Energija") is the leading independent producer of electricity from renewable sources in the Republic of Serbia. Fintel Energija's subsidiaries are pioneers in the field of electricity production from renewable sources, being the first companies to complete the construction and operate wind farms in Serbia.

The Company was founded on June 27, 2007 as a closed joint stock company under the name "Privredno društvo za proizvodnju električne energije Fintel Energija a.d. Beograd" ("Electricity Production Company Fintel Energija ad Belgrade"), by "Fintel Energia Group S.P.A." (registration number 02658620402) which is also the sole shareholder of the Company ("Owner"). "Fintel Energia Group S.P.A." is 86.22% owned by Hopafi Srl ("Ultimate Owner").

The headoffice of "Fintel Energija" is located at Masarikova Street No. 5, Belgrade, Serbia.

As of December 31, 2025, the Company has subscribed and paid-in share capital in the amount of RSD 4,057 thousand, consisting of 26,510,506 ordinary shares with an individual nominal value of RSD 0.153.

The Company's shares are traded on an organized market – the Belgrade Stock Exchange. The stock symbol is FINT, and the ISIN number is RSFINEE60549. The Company's market capitalization as of December 31, 2025 is RSD 17,762,039 thousand (unit price per share is RSD 670).

Fintel Energia Group S.P.A., the majority shareholder of the Company, is a joint-stock company established in accordance with the law in force in the Republic of Italy, and is a vertically integrated operator in the energy supply chain, whose business is the sale of electricity and natural gas in Italy, as well as the development and exploitation of renewable energy sources (solar energy and wind energy) in Italy and Serbia.

The submitted separate financial statements for the period ended December 31, 2025 were approved for issue by the Company's directors on April 28, 2026.

On December 31, 2025, the Company had 14 employees (2024: 14 employees).

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies

The principal accounting policies applied in the drafting of these financial statements are presented below. These policies have been consistently applied to all presented years, unless otherwise indicated.

2.1. Basis for drafting and presentation of individual financial statements

The Company keeps records and prepares financial statements in accordance with the Accounting Law of the Republic of Serbia ("Official Gazette of the Republic of Serbia", No. 73/2019 I 44/2021) and other applicable legal regulations in the Republic of Serbia.

Pursuant to the Accounting Act, large legal entities, legal entities that have the obligation to prepare consolidated financial statements (parent legal entities), public companies, i.e. companies that are preparing to become public pursuant to the Capital Market Act of the Republic of Serbia, regardless of size, for the recognition, valuation, presentation and disclosure of positions in financial reports, they apply the International Financial Reporting Standards (IFRS), whose translation into Serbian was published by the Ministry in charge of financial affairs.

International Financial Reporting Standards published in Serbian by the Ministry of Finance include the Conceptual Framework for Financial Reporting, International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board, as well as interpretations of standards issued by the Accounting Standards Interpretations Committee, but do not include bases for conclusions, illustrative examples, application guidance, commentaries, dissenting opinions, or other supporting materials except in cases where they are explicitly included as an integral part of the standard or interpretation.

IAS, IFRS and interpretations published by the Board for International Accounting Standards and the Committee for Interpretations of Accounting Standards were officially translated by the decision of the Ministry of Finance of the Republic of Serbia on determining the translation of International Financial Reporting Standards (Decision number 401-00-4980/2019-16) and published in Official Gazette of the Republic of Serbia No. 92 of November 21, 2019 and are applied when preparing consolidated financial statements for annual periods ending on December 31, 2020 or after that date.

New or amended IFRS and interpretations adopted by the decision of the Ministry of Finance of the Republic of Serbia on determining the translation of International Financial Reporting Standards published in the Official Gazette of the Republic of Serbia No. 123/2020 on October 13, 2021 are applied when preparing financial statements for annual periods ending on or after December 31, 2021.

In addition, the attached financial statements have been prepared in accordance with the requirements of the Rules on the Chart of Accounts and the Content of Accounts in the Chart of Accounts for Companies, Cooperatives and Entrepreneurs (Official Gazette of the Republic of Serbia No. 89/2020) and the Rules on the Content and Form of Financial Statement Forms for Companies, Cooperatives and Entrepreneurs (Official Gazette of the Republic of Serbia No. 89/2020).

The aforementioned regulations governing the presentation of financial statements have precedence over the requirements defined in this regard by IFRS, which are published by the Ministry of Finance.

Due to the above deviations, these financial statements are not in accordance with IFRS.

(All amounts are expressed in RSD 000, unless otherwise indicated)

3. Overview of significant accounting policies (continued)

2.1. Basis for drafting and presentation of individual financial statements (continued)

The accompanying financial statements represent individual financial statements that include receivables, liabilities, operating results, changes in other comprehensive income, changes in equity and cash flows of the Company. The Company has prepared these individual financial statements in accordance with the deadlines prescribed by the Accounting Law of the Republic of Serbia. The Company also prepares consolidated financial statements for the Company and its related parties (the Group) with the prescribed deadline for issuance by April 30, 2026. Users of these financial statements should view them together with the consolidated financial statements of the Group as at and for the year ended December 31, 2025, for the purpose of obtaining complete information about the financial position, operating results and changes in the financial position of the Group as a whole. The method of recognition of investments in equity of subsidiaries is disclosed in note 3, and details of investments in subsidiaries are disclosed in note 8.

The preparation of financial statements pursuant to the Accounting Law of the Republic of Serbia requires the application of certain critical accounting estimates. It also requires management to exercise its judgment in applying the Company's accounting policies. Areas that require a higher degree of judgment or greater complexity, or areas where assumptions and estimates are material to the financial statements, are disclosed in Note 3.

2.2. Accounting basis

These financial statements have been prepared under the historical cost principle, unless the application of fair value is specifically stated. The financial statements are presented in of the Republic of Serbia ("RSD"), which is also the functional currency of the Company, and all reported numerical values are expressed in thousands of dinars (RSD'000), unless otherwise stated. The principal accounting policies applied in the preparation of these financial statements are disclosed in Note 2.4.

Comparative data are presented in the financial statements for the year ended December 31, 2024.

The financial statements have been prepared in accordance of the going concern concept, which implies that the Company shall continue to operate indefinitely period of time for the foreseeable future. In order to determine the validity of this assumption, management analyzes future cash flow projections. Based on the aforementioned analysis, management believes that the Company is capable to continue its business activities in accordance with the going concern principle and that this principle should be applied in the preparation of these financial statements.

2.3. Foreign currency conversion

Functional and display currency

Items included in the Group's financial statements are measured and presented in thousand of dinars (RSD). The dinar is the official reporting currency in the Republic of Serbia.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates ruling at the date of the transaction or at the date of the valuation if the items have been remeasured. Exchange gains and losses arising from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at the year-end are recognised in the income statement, except when they are deferred in equity as cash flow hedges and net investment hedges.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4. Significant accounting policies

Real estate, plants and equipment

Real estate, plants and equipment are stated at purchase cost less accumulated depreciation. The purchase price includes all expenses necessary to put the asset to its intended use. This value is increased by the present value of the estimated cost of land reclamation when there is a legal or construction obligation to remove the asset. The related liability is recognized as a provision for the costs of removing the asset. The accounting treatment of revised estimates of these costs, the time value of money and the discount rates are highlighted in the section on provisions for these costs.

Borrowing costs that are directly attributable to the acquisition or construction of an asset that qualifies for the attribution of borrowing costs are included in the purchase value of the mentioned asset that qualifies, i.e., one that takes a substantial period of time to prepare for planned use or sale.

Costs incurred for regular and/or periodic repairs and maintenance are recognized directly in the income statement. Costs incurred for the expansion, modernization or improvement of structural elements owned by the Company or used by third parties are capitalized to the level when they meet the conditions to be recognized as a separate asset or part of an asset.

Depreciation is calculated using the straight-line method using rates that allow the assets to be depreciated over their estimated useful life. When an asset consists of several individually identifiable assets with estimated useful lives that are significantly different from the others, depreciation of those assets is calculated separately.

Estimated useful life for each category of property, plant and equipment:

	Number of years
Construction object	40
Equipment	3-20

Impairment of property

On the date of preparation of the financial statements, an assessment is made of the existence of any indications of impairment of tangible assets. The Company's assets are stated at a value that does not exceed their recoverable amount. If there is an indication that, for the said asset, there is an impairment, the recoverable amount of that asset is estimated in order to determine the amount of the impairment. The booking amount is reduced to the recoverable amount, and the difference is recognized as an expense (loss on impairment of assets) charged to the income statement in the period in which the impairment occurred. The impairment loss is reversed if the circumstances that affected the impairment have changed.

Leasing

When applying IFRS 16 to leases, the Company recognizes assets representing the right-of-use and lease liabilities in the balance sheet, which are initially measured at the present value of future lease payments, and recognizes depreciation expense on the right-of-use assets and interest expense on the lease liability in the income statement.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of Significant Accounting Policies (Continued)

2.4. Significant Accounting Policies (Continued)

Leasing (Continued)

Valuation

The lease liability is initially measured at the net present value of all future lease payments discounted at the interest rate included in the lease (the implicit interest rate). If it cannot be readily determined, the Company uses its incremental borrowing rate.

Future lease payments, which after discounting are included in the value of the lease liability, include:

- fixed payments (including variable payments that are essentially fixed) less any lease incentives received
- variable lease payments, i.e., payments that depend on market indices or rates, which are initially valued on the lease commencement date, using the market index or rate
- cost price of the call option if it is reasonably certain that the option will be exercised
- penalties for termination of the contract, if it is reasonably likely that the termination option will be exercised.

After initial recognition, the lease liability is increased by accrued interest (using the effective interest rate) and decreased by lease payments made.

Right-of-use assets are initially measured at cost, which initially consists of the value of the lease liability initially recognized, the amount of prepaid lease payments and deposits given before the lease commencement date, less any lease incentives received from the lessor and less any initial direct costs. The right-of-use asset is subsequently measured at cost less any accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter of the lease term or the useful economic life of the leased asset.

Variable payments that are not index- or rate-linked are not included in the measurement of the lease liability or right-of-use asset. Such payments are recognized as an expense in the period in which they are incurred.

Company as a lessor

The Company applies a uniform recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities for lease payments and the right-of-use, which represents the right to use fixed assets.

Right to use funds

The Company recognizes the right to use the property at the commencement date (i.e. the date the property is available for use). The right to use the property is valued at cost, less accumulated depreciation and impairment losses, and adjusted for any subsequent value of the lease liability. The cost of the right to use the property includes the amount of the lease liability recognized, initial direct costs and lease payments made on or before the commencement date, less any lease incentives received.

The right to use the property is depreciated proportionally over the shorter of the lease term or the estimated useful life of the property.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4. Significant Accounting Policies (continued)

Leasing (continued)

Leasing liabilities

On the lease commencement date, the Company recognizes lease liabilities, valued at the present value of the lease payments to be made over the lease term. Lease payments include fixed payments, net of any lease incentive receivables, variable lease payments that are index- or rate-linked, and amounts expected to be paid for the residual value. Lease payments also include the exercise price of a purchase option that is reasonably expected to be exercised by the Company and the payment of a termination penalty, if the termination option is exercisable by the Company during the term of the lease agreement.

Variable lease payments that are not index- or rate-linked are recognized as expenses (unless incurred for the production of inventories) in the period in which the events or conditions giving rise to the payment occur.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the inception date because the implicit interest rate for the lease is not readily determinable. After the inception date, the amount of the lease liability is increased by accrued interest for the past period and decreased by lease payments made. In addition, the carrying amount of the lease liability is remeasured if there is a modification to the contract, a change in the lease term, a change in the lease payments (e.g., changes in future payments resulting from a change in the index or rate used to determine such lease payments) or a change in the valuation of the purchase option of the fixed asset that is the subject of the lease.

Short-term leases and leases of low-value assets

The Company applies an exemption from short-term lease recognition for its short-term leases of machinery and equipment (i.e. those leases that have a term of less than 12 months from the commencement date and that do not include a purchase option). Lease payments for short-term leases and leases of low-value assets are recognized as an expense, proportionally over the lease term.

The Company as a Lessor

Leasing is classified as operating when the contract stipulates that not all the risks and rewards incidental to ownership of the asset are transferred to the lessee.

All payments during the year under operating leases, which relate to the supply of services and goods that do not have a one-time effect, are accrued on a straight-line basis and recorded as an expense in the income statement over the lease term.

The company as beneficiary of the lease

Assets held under finance lease agreements are initially recognised as assets of the company at the present value of the minimum lease payments determined at the beginning of the lease term. The corresponding liability to the lessor is included in the balance sheet as a liability under a finance lease.

Lease installment payments are distributed between financial expenses and reductions in lease liabilities with the aim of achieving a constant rate of participation in the outstanding amount.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Financial instruments

Financial assets and financial liabilities are recorded in the Company's balance sheet from the moment the Company becomes contractually bound to the instrument. Purchases or sales of financial assets are recognized using the settlement date method, which is the date when the asset is delivered to the other party.

Financial assets are derecognized when the Company loses control of the contractual rights to those instruments, which occurs when the rights to use the instruments are exercised, expired, abandoned or assigned. A financial liability is derecognized when the obligation stipulated in the contract is discharged, cancelled or expired.

The Company has been applying IFRS 9 since January 1, 2020. Accordingly, the Company classifies its financial assets into the following categories: financial assets valued at depreciated value, financial assets valued at fair value through other comprehensive income, and financial assets valued at fair value through the income statement.

A financial asset will be valued at depreciated value if both of the following conditions are met and it is not indicated at fair value through the income statement:

- The asset is held within a business model whose objective is to hold the asset with the intention of collecting contractual cash flows, and
- The contractual terms of the asset result on given dates in cash flows that are solely payments of principal and interest on the remaining principal amount.

A financial asset shall be measured at fair value through other comprehensive income if both of the following conditions are met and it is not designated at fair value through profit or loss:

- The asset is held within a framework of a business model whose objective is achieved both through the collection of contractual cash flows and the sale of financial assets, and
- The contractual terms of the asset result on given dates in cash flows that are exclusively payments of principal and interest on the remaining principal amount.

All financial assets that are not classified as measured at depreciated cost or fair value through other comprehensive income, as described above, are measured at fair value through the income statement.

This includes financial assets held for trading and managed and whose performance is valued at fair value. In addition, upon initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be valued at depreciated cost or at fair value through other comprehensive income, at fair value through the income statement if doing so eliminates or significantly reduces an accounting inconsistency that would otherwise arise.

A financial asset is classified into one of these categories upon initial recognition.

Financial assets are reclassified only when the Company changes the business model that affects the asset, in which case all financial assets that suffer that impact are reclassified on the first day of the reporting period after the change in business model.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Business model assessment

The business model is assessed with the aim of determining whether a financial asset with only principal and interest payments is classified at depreciated cost or fair value through other comprehensive income. The business model determines whether the cash flows arise from collecting contractual cash flows, selling the financial asset, or both.

Derecognition of financial assets and financial liabilities

The Company ceases to recognize a financial asset when the contractual rights to the cash flows from the financial asset expire or when it transfers all rights to the contractual cash flows in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred, or when it neither transfers nor retains substantially all the risks and rewards of ownership and does not retain control of the transferred asset.

Any interest in such a financial asset created or retained by the Company is recognized as a separate asset or liability.

A financial asset ceases to be recognized when it is written off. A financial asset also ceases to be recognized when there is a change in the contractual terms of the financial asset that results in a significant change in the cash flows from the financial asset.

Impairment of financial assets

In accordance with IFRS 9, the Company applies a forward-looking "expected credit loss" model, which requires significant judgment regarding how changes in economic factors affect expected credit losses, which are determined on a probability-weighted basis.

The "expected credit loss" model is applied to financial assets valued at depreciated cost, contract assets and debt instruments valued at fair value through other comprehensive income, but not to investments in equity instruments.

In accordance with IFRS 9, provisions for losses shall be valued on one of the following two bases:

- 12-month expected credit losses – these are expected credit losses arising from all possible default events during the 12 months following the reporting date, and
- Expected credit losses over the life of the instrument – these are expected credit losses arising from all possible default events over the expected life of the financial instrument.

The impairment requirements in IFRS 9 are complex and require management judgment, as well as estimates and assumptions, particularly regarding the following:

- Determining whether the credit risk of a financial asset has increased significantly since initial recognition, and
- Considering the information about future circumstances when estimating expected credit losses.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Long-term financial investments

Equity investments in other listed companies are initially valued at cost. Subsequent valuation is performed at each balance sheet date to adjust their value to market value.

Long-term financial investments that include equity investments in related legal entities, commercial banks and other legal entities that are not listed on the stock exchange are stated at cost less impairment based on management's assessment in order to reduce them to their recoverable amount.

Trade receivables, short-term placements and other short-term receivables

Trade receivables, short-term placements and other short-term receivables are stated at nominal value, less any allowances made based on management's assessment of their collectability.

Cash and cash equivalents

Cash and cash equivalents include: cash on hand, demand deposits with banks or other financial institutions for current transactions, postal current accounts and other cash equivalents, as well as other investments with original maturities of up to three months.

Financial liabilities

Financial liabilities are classified in accordance with the substance of the contractual provisions. Financial liabilities are stated at nominal value, increased by interest based on concluded contracts.

Business liabilities

Trade payables and other operating liabilities are valued at their nominal value.

Provisions

Provisions are recognized when the Company has a present legal or contractual obligation as a result of past events and it is probable that an outflow of funds will be required to settle the obligation. The amount recognized represents the best estimate of the expenditure required to settle the obligation. When the time value of money is significant and the date of settlement of the obligation can be determined approximately, the provision is valued at the present value of the expenditure required to settle the obligation, using a pre-tax discount rate that reflects current market assessments of the value of money and the risks specific to the obligation. Any increase in the provision due to the passage of time is reported as interest expense.

If the provision relates to disassembly and removal, the provision is recognised as part of the asset to which it relates and the expense is recognised in the income statement as depreciation of the asset to which the expense relates.

Changes in accounting estimates are reflected in the income statement in the year in which the change occurs, except for changes in expected dismantling and removal costs due to changes in the timing and use of economic resources required to settle the obligation, or changes resulting from changes in the discount rate.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Provisions (continued)

Such changes are added to or subtracted from the book value of the asset to which they relate and are recognized in the income statement through depreciation. If changes are added to the book value of the asset, the Company makes an assessment whether the new present value will be fully compensated; if not, the present value of the asset is reduced to take into account the irrecoverable amount and a loss is recognized in the income statement.

If the changes are deducted from the carrying amount of the asset, the decrease is recognized as a reduction of the asset to the amount of its book value, any excess is recognized immediately in the income statement.

Regarding the adopted assessment criteria for determining the deactivation or recovery of assets, it is explained in the paragraph Estimates and assumptions.

Risks that may cause an increase in a contingent liability are disclosed in the contingent liabilities and risks section, but are not recognized.

A potential liability arising from a business combination is measured at the higher of the amount that would have been recognized applying the above policy for provisioning costs and the present value of the initially defined liability.

Revenue recognition

The company operates as a holding company and performs management and financing activities.

Revenue from contracts with customers is recognized when control over the expected products is transferred to the customer, or when the service is performed, in an amount that reflects the consideration to which the Company expects to be entitled in exchange for the related products/goods or services.

Revenues from the provision of services are recognized in the accounting period in which the service was provided and are reported at the invoice value minus approved discounts.

Contracts with customers define the key commercial terms on which customers place their orders. From a revenue recognition perspective, a contract is viewed as a combination of the underlying contract with customers and the orders placed.

Specifically, the revenue recognition process involves the following 5 steps:

- Step 1: Identify the contract(s) with the customer;
- Step 2: Determine performance obligations from the contract;
- Step 3: Determine the transaction price;
- Step 4: Distribute the transaction price to the performance obligations under the contract; and
- Step 5: Recognize revenue when the entity fulfills (or while fulfilling) the performance obligation.

The Company recognizes income when a performance obligation is fulfilled (or during fulfillment of that obligation), i.e., when 'control' over the goods or services underlying the specific obligation is transferred to the customer.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Financial income and expenses

Financial income consists of interest on loans, interest receivables from placed funds and positive exchange rate differences. Interest income is recognized in the income statement on an accrual basis, using the effective income method. Interest income is recognized in the income statement of the period to which it relates, in accordance with the principle of causation.

Financial expenses that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the purchase price of the asset, starting from the date the Company incurs the financial expenses until the date the financed asset is ready for use.

Dividends

Distribution of dividends to the Company's shareholders is recognized as a liability in the financial statements in the period in which the Company's shareholders approved the dividends.

Earnings per share

Basic earnings per share are calculated by dividing the profit/(loss) attributable to the Company's shareholders by the weighted average number of ordinary shares outstanding for the period.

Operating expenses

Operating expenses include general expenses such as rent, marketing, insurance, payment transactions, taxes, and other expenses incurred in the current accounting period.

Other expenses

Other expenses include losses from the sale and disposal of real estate, plant, equipment and intangible assets, losses from the sale of securities and equity interests in legal entities, losses from the sale of materials, deficits, expenses from direct write-offs of receivables, expenses from asset impairment, negative effects of value adjustments of intangible assets, real estate, plant, equipment, long-term and short-term financial investments, inventories, securities and receivables in accordance with the Company's accounting policy.

Employee benefits

a) Taxes and contributions to employee social security funds

In accordance with the regulations applicable in the Republic of Serbia, the Company is under the obligation to pay taxes and contributions to tax authorities and state funds that ensure social security of employees. These obligations include taxes and contributions for employees at the expense of the employer in amounts calculated at the rates prescribed by law. The Company is also obliged to withhold contributions from the gross salary of employees and to pay them to the funds on behalf of the employees. Taxes and contributions at the expense of the employer and taxes and contributions at the expense of the employee are recorded as expenses in the period to which they relate.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Employee benefits (continued)

b) Severance pay liabilities

In accordance with the provisions of the Labor Law, the Company is obliged to pay an employee a severance pay upon retirement in the amount of three average salaries in the Republic of Serbia, determined according to the latest published data from the republican authority responsible for statistics.

To employees whose work is no longer needed and who are not provided with any of the rights established by law, the employer shall pay severance pay in the amount of the sum of one third of the employee's salary for each completed year of work in the first 10 years of employment and one quarter of the employee's salary for each subsequent completed year of work in employment over 10 years of employment. Earnings within the meaning of the previous paragraph shall be considered the average salary of the employee paid for the last 3 months preceding the month in which the severance pay is paid.

Income tax

Current income tax

Current income tax represents the amount calculated by applying the prescribed tax rate of 15% to the base determined by the tax balance, which represents the amount of profit before tax after deducting the effects of adjusting income and expenses, in accordance with the tax regulations of the Republic of Serbia, with a reduction for prescribed tax credits.

The Law on Profit Tax of the Republic of Serbia does not provide that tax losses from the current period can be used as a basis for refunding taxes paid in previous periods. However, losses from the current period reported in the tax balance sheet can be used to reduce the tax base of future accounting periods, but not longer than five years. Tax losses incurred before January 1, 2010 can be carried forward against future profits for a period not longer than ten years.

Deferred income tax

Deferred income tax is calculated using the balance sheet liability method for temporary differences arising from differences between the tax bases of assets and liabilities and their carrying amounts. Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences and tax losses and credits that can be carried forward to future fiscal periods, to the extent that it is probable that taxable profit will be available against which the deferred tax assets can be utilized.

Deferred tax assets and liabilities are calculated at the tax rate expected to apply in the period when the asset is realized or the liability is settled. As of 31 December 2025, deferred tax assets and liabilities were calculated at a rate of 15% (December 31, 2024: 15%)

Deferred tax is charged or credited to the income statement, except when it relates to items that are charged or credited directly to equity, in which case the deferred tax is also allocated within equity.

(All amounts are expressed in RSD 000, unless otherwise indicated)

2. Overview of significant accounting policies (continued)

2.4 Significant Accounting Policies (continued)

Transactions with related legal entities

For the purposes of these financial statements, legal entities are treated as related if one legal entity has the ability to control another legal entity or exercise significant influence over the financial and operating decisions of the other entity in accordance with the provisions of IAS 24: "Related Party Disclosures".

The Company considers related legal entities in terms of the above-mentioned standard to be legal entities in which it has a share in the capital, or legal entities with a share in the capital of the Company.

Related parties may enter into transactions that unrelated parties might not, and transactions with related parties may be conducted under different terms and for different amounts than the same transactions with unrelated legal entities.

The Company provides services to related parties and is at the same time a user of their services. Relations between the Company and related parties are regulated on a contractual basis and at market conditions.

The Company has disclosed all transactions with related parties in the attached financial statements, as required by IAS 24 - "Related Party Disclosures".

3. Estimates and assumptions

The preparation of these separate financial statements requires management to apply accounting policies and methods, which in certain circumstances are based on accounting estimates and assumptions, and which may also be based on past experience and assumptions that are considered reasonable and realistic. The use of such estimates and assumptions affects the separate financial statements, including the balance sheet, income statement, statement of other financial performance and statement of cash flows, as well as the related disclosures in the notes to the separate financial statements. The actual amounts of items in the financial statements for which the aforementioned estimates and assumptions were used may differ from the amounts recognized in the financial statements due to the uncertainty of the assumptions and conditions on which the estimates are based.

Below is a brief description of the key accounting estimates used in the preparation of the individual financial statements.

Impairment of equity participation in subsidiaries

Investments in subsidiaries are tested for impairment, which, when there are indicators that indicate that it is difficult to recover the net book value, should be recognized as an impairment. Verification of the existence of the aforementioned indicators requires subjective assessments by management, based on information available to the Company, market information and based on past experience. If it is determined that potential impairment may occur, the Company's management uses a valuation technique to calculate the amount of potential impairment. The accurate identification of indicators of potential impairment, as well as the calculation of estimates for its determination, depends on factors that may change over time and that may affect the assumptions and estimates made by management.

Based on the assessments made by the Company's management, there are no indicators of impairment of the equity interest.

(All amounts are expressed in RSD 000, unless otherwise indicated)

3. Estimates and assumptions (continued)

Provisions

Other provisions for risks and compensations mainly relate to possible liabilities for fines and interest on amounts due to tax authorities. The allocation of provisions is made based on the best estimates of the costs, at the reporting date, that are likely to be incurred to settle the obligation, after seeking legal advice.

4. Financial risk management

Coordination and monitoring of key financial risks is carried out by the owner's central treasury department, which provides guidelines for managing different types of risks and for the use of financial instruments. The main features of the Company's risk management policies are:

- centrally setting operational risk management guidelines relating to market, liquidity and cash flow risks;
- monitoring of achieved results;
- diversification of commitments/obligations and product portfolio.

Credit risk

Credit risk represents exposure to potential losses arising from the failure of business and financial counterparties to meet their contractual obligations.

The maximum credit risk exposure of the Company as of December 31, 2025 and 2024 is the book value of each class of assets as indicated in the following table:

<i>RSD thousands</i>	December 31, 2025	December 31, 2024
Trade receivables	33,900	51,427
Other receivables	52,134	19,882
Long-term receivables and investments	1,478,362	1,832,523
Short-term receivables and investments	71,506	14
Active time limits	408,223	325,620
TOTAL	2,044,125	2,229,466

Trade receivables as of December 31, 2025 amounted to RSD 33,900 thousand and mostly relate to re-invoiced services related to the management fee. Re-invoicing of these services has been carried out since 2024 and relates to the management fee provided by Fintel Italy to Fintel Serbia and other related entities. In the previous year, as of December 31, 2024, trade receivables amounted to RSD 51,427 thousand.

In 2025, other receivables amount to RSD 52,134 thousand and are significantly higher compared to the previous year, when they amounted to RSD 19,882 thousand. This difference arises primarily from the fact that in 2025, dependent legal entities returned a certain part of the loans. For loans that are fully repaid, but the interest that is not, it is in the position of Other receivables.

(All amounts are expressed in RSD 000, unless otherwise indicated)

4. Financial Risk Management (continued)

Credit risk (continued)

Long-term receivables and investments relate to loans granted by Fintel Energija to related parties. In 2025, these receivables amounted to RSD 1,478,362 thousand, while in 2024 they amounted to RSD 1,832,523 thousand. Compared to the previous year, long-term receivables and investments decreased by RSD 354,161 thousand. A certain part of the loans was returned (4,125,399 EUR), but on the other hand, new loans were given to related legal entities (1,070,000 EUR).

Prepayments and accrued income consist of interest receivables from loans granted to subsidiaries. In 2025, they amounted to RSD 408,223 thousand, while in 2024 they amounted to RSD 325,620 thousand. Compared to the previous year, prepayments and accrued income increased by RSD 82,603 thousand. This increase is a direct consequence of the growth of long-term receivables and investments, i.e., an increase in the amount of loans granted to subsidiaries, which also resulted in an increase in accrued interest receivables (MK Fintel Wind ad., MK Fintel Wind Holding doo, VP Lipar doo, VP Lipar 2 doo, Project Torak doo, Fintel Energija Development doo and other subsidiaries).

According to the cash flow projections of the subsidiaries, these assets carry a low level of credit risk.

Liquidity risk

Liquidity risk is related to the ability to meet obligations arising from financial commitments undertaken by the Company. Prudent management of liquidity risk during regular activities involves maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of term loan funds.

The Company manages liquidity risk centrally, as the administration department periodically monitors the Company's net cash/debt through the preparation of appropriate cash inflow and outflow reports. In this way, the Company aims to ensure adequate coverage for financing needs, by precisely monitoring financing, open credit lines and their use, all with the aim of optimizing its resources and managing temporary liquidity surplus.

The Company's objective is to establish a financing structure that, in accordance with its business objectives, guarantees sufficient liquidity for the Company, minimizes opportunity costs and maintains a balance in terms of maturity and debt composition.

The following table presents an analysis of the maturity of liabilities as of December 31, 2025 and 2024. The different maturities are determined based on the period between the reporting date and the contractual maturity of the Company's liabilities, gross of accrued interest as of 31 December. Interest is calculated in accordance with the contractual terms of the financing.

<i>RSD thousands</i>	December 31, 2025			
	Less than a year	1-2 years	2-5 years	Over 5 years
Financial liabilities to shareholders	3,704		1,074,625	-
Liabilities for loans to banks	-			-
Liabilities to suppliers	12,751			-
Other obligations	322,561			-
Total	339,016	-	1,074,625	-

(All amounts are expressed in RSD 000, unless otherwise indicated)

4. Financial Risk Management (continued)

Liquidity risk (continued)

<i>RSD thousands</i>	December 31, 2024			
	Less than a year	1-2 years	2-5 years	Over 5 years
Financial liabilities to shareholders	13,745	-	1,072,178	-
Liabilities for loans to banks	-	-	-	-
Liabilities to suppliers	34,119	-	-	-
Other liabilities	281,085	-	-	-
Total	329,679	-	1,072,178	-

Market risk

In performing its business, the Company is potentially exposed to the following market risks:

- the risk of exchange rate fluctuations;
- the risk of interest rate fluctuations.

These risks are essentially centrally managed by the parent company Fintel Energija.

Risk of exchange rate fluctuations

Foreign exchange risk is associated with operations in currencies other than RSD. The Company is exposed to foreign exchange rate fluctuations, as it conducts business in Serbia through its subsidiaries, which are companies dedicated to the study, construction, development and management of wind farms and other renewable energy projects. The impact is presented in the balance sheet and income statement of subsidiaries.

By performing an accounting sensitivity analysis as of December 31, 2025, if the currency had strengthened/weakened by 5% against the EUR and all other variables remained constant, the result after tax would have been RSD 45,829 thousand (2024: RSD 46,152 thousand) higher/lower, mainly as a result of positive and negative exchange rate differences due to the exchange rate of liabilities denominated in EUR.

Risk of interest rate fluctuations

The Company is exposed to interest rate risk arising from its financial liabilities. Fixed-rate debt exposes the Company to the risk of changes in the fair value of the debt that are related to changes in market reference rates. Variable-rate debt exposes the Company to cash flow risk arising from interest rate volatility.

The Company's financial indebtedness consists of current debt to the parent company, where the interest rate is fixed.

As a result of the aforementioned hedging transactions, the impact of expected changes in interest rates over the next twelve months is considered negligible in the context of the Company's financial statements.

(All amounts are expressed in RSD 000, unless otherwise indicated)

4. Financial Risk Management (continued)

Market risk (continued)

Capital management risk

The Company's goal in terms of capital risk management is to preserve business continuity in order to guarantee returns to shareholders and benefits to other stakeholders. Furthermore, the Company aims to maintain an optimal capital structure in order to reduce borrowing costs.

The Company monitors its capital based on the ratio of net debt to net invested capital (gearing ratio). Net debt is calculated as total debt, including current and long-term loans and borrowings, plus net exposure to banks. Net invested capital is calculated as the sum of total capital and net debt.

The debt ratio as at December 31, 2025 and 2024 is presented in the following table:

<i>RSD thousands</i>	31.12.2025	31.12.2024
<i>Long-term financial liabilities:</i>		
- Bank loans	-	-
<i>Short-term financial liabilities:</i>		
- Financial liabilities to shareholders	1,078,329	1,085,923
Cash and cash equivalents	(378,085)	(119,695)
Net debt (A)	700,244	966,228
Capital (B)	1,027,749	963,919
Net capital employed (C=A+B)	1,727,993	1,930,147
Debt ratio (A/C)	40.5%	50.1%

(All amounts are expressed in RSD 000, unless otherwise indicated)

5. Financial assets and liabilities by class

The following table shows the Company's financial assets and liabilities by class, with an indication of the corresponding fair value, as at December 31, 2025 and 2024:

RSD thousands	December 31, 2025				Total
	Depreciated cost	Fair value through other income	Fair value through profit or loss	Hedge accounting	
Financial assets	1,478,362	-	-	-	1,478,362

Operations liabilities	34,119	-	-	-	34,119
Other short-term liabilities	281,806	-	-	-	281,806
Total	1,357,678	-	-	-	1,357,678

6. IFRS 8: Segment information

Based on the fact that the Company operates only in the renewable energy sector and in Serbia, there is only one reporting segment.

(All amounts are expressed in RSD 000, unless otherwise indicated)

7. Information on guarantees assumed, actual and other contingent liabilities

a) Guarantees issued

No guarantees were issued.

b) Other

There were no other potential liabilities of the Company.

8. Participations in the capital of dependent legal entities

Direct investments in related companies are presented below:

- RSD 16,009 thousand refers to 54% ownership in MK-Fintel Wind AD (RSD 16,009 thousand as at December 31, 2024).
- RSD 5 thousand refers to 54% ownership in MK-Fintel Wind Holding Doo (RSD 5 thousand as at December 31, 2024).
- RSD 200 for 100% ownership in Fintel Energija Development Doo (RSD 200 on December 31, 2024).

In 2025, the Company, as the parent legal entity of the business group, had a share in the capital of the following dependent legal entities:

Name	Share capital (RSD '000)	Head office	31/12/2025 % participation	31/12/2024 % participation	
MK-Fintel Wind ad	29,647	Belgrade (Serbia)	54%	54%	Directly

(All amounts are expressed in RSD 000, unless otherwise indicated)

9. Long-term loans and placements – parent and subsidiary legal entities

Long-term financial liabilities – parent and subsidiaries amount to RSD 1,478,362 thousand (2024: RSD 1,832,523 thousand) and relate to financing provided to subsidiaries and other related entities, as set out in the tables below:

Loan beneficiary	Amount 31.12.2025 EUR	Amount 31.12.2025 RSD	Amount 31.12.2025 RSD	Maturity
MK Fintel Wind ad	7,123,847	835,499	1,212,706	2036
MK Fintel Wind Holding d.o.o.	847,407	99,386	202,783	2030
MK-Fintel Wind Development d.o.o.	84,200	9,875	5,055	2030
Maestralski Ring d.o.o.	250,000	29,321	5,851	2030
VP Lipar d.o.o.	1,992,000	233,626	188,628	2038
VP Lipar 2 d.o.o.	1,904,000	223,305	183,011	2038
Project Torak d.o.o.	83,500	9,793	8,893	2030
Fintel Energija Development d.o.o.	191,440	22,452	21,114	2030
Staklenik 1 d.o.o.	44,000	5,160	585	2030
Staklenik 2 d.o.o.	27,600	3,237	819	2030
Staklenik 3 d.o.o.	13,200	1,548	878	2030
Staklenik 4 d.o.o.	11,000	1,290	585	2030
Staklenik 5 d.o.o.	10,800	1,267	503	2030
Staklenik 6 d.o.o.	9,500	1,114	410	2030
Viafast d.o.o.	10,700	1,255	468	2030
Balkan-electro d.o.o.	2,000	235	234	2027
Total	12,605,194	1,478,363	1,832,523	

Long-term financial placements were made to subsidiaries and other related parties. The given placements bear an arm's length interest rate, which in 2025 amounts to 6.79%.

Long-term financial investments refer to loans that Fintel Energija provides to subsidiaries and other related parties. In 2025, these receivables amount to 1,478,362 thousand RSD, while in 2024 they amounted to 1,832,523 thousand RSD. Compared to the previous year, long-term receivables and investments decreased by 3,055,399 EUR (returned part of the loans in the amount of 4,125,399 EUR and new loans were granted in the amount of 1,070,000 EUR). These funds are used for project development, enabling the financing and implementation of new investments in the renewable energy sector.

The Company has no significant loan credit losses related to the aforementioned placements and loans.

(All amounts are expressed in RSD 000, unless otherwise indicated)

10. Trade receivables

Trade receivables as of December 31, 2025 and 2024 amount to:

<i>RSD thousands</i>	December 31, 2025.	December 31, 2024.
Receivables from customers in the country	16,587	6,981
Receivables from the parent company, subsidiaries and other related parties in the country	17,313	44,446
Trade receivables	33,900	51,427

Trade receivables relate to re-invoiced services related to the management fee. The re-invoicing of these services has been carried out since 2024 and relates to the management fee provided by Fintel Italy to Fintel Srbija and other related entities.

This re-invoicing model was introduced to more accurately reflect project management costs and obligations within related legal entities.

11. Cash and cash equivalents

Cash and cash equivalents as of December 31, 2025 and 2024 are:

<i>RSD thousands</i>	December 31, 2025.	December 31, 2024.
Current account		
- in dinars	378,045	119,655
- in foreign currency	40	40
Cash and cash equivalents	378,085	119,695

The market value of cash and cash equivalents matches its book value.

For the purpose of preparing the statement of cash flows, investments and financing transactions that did not require the use of cash or cash equivalents are excluded.

12. Other short-term assets

Other short-term assets in the amount of RSD 52,134 thousand as of December 31, 2025 (RSD 19,882 thousand as of December 31, 2024) are presented in more detail in the following table:

<i>RSD thousands</i>	December 31, 2025	December 31, 2024
Other receivables	47,901	15,648
Claims for overpaid income tax	4,224	4,224
Receivables for prepaid other taxes and contributions	9	10
Total	52,134	19,882

(All amounts are expressed in RSD 000, unless otherwise indicated)

12. Other short-term assets (continued)

In 2025, other receivables amount to RSD 52,134 thousand and are significantly higher compared to the previous year, when they amounted to RSD 19,882,000 thousand. This difference arises primarily from the fact that in 2025 subsidiaries returned certain part of loans. For loans which were completely returned while interest was not, it is in the position of Other receivables.

13. Short-term active accruals

Short-term active accruals and deferred income as of 31 December 2025 amounted to RSD 408,223 thousand (RSD 325,620 thousand as of 31 December 2024). The majority of accrued income and deferred income relates to accrued but unpaid interest on loans granted to subsidiaries and other subsidiaries and other related entities. These receivables represent income that shall be realized in future accounting periods, in accordance with the agreed financing terms.

14. Equity

Equity as of December 31, 2025 and 2024 is presented in the table below:

<i>RSD thousands</i>	December 31, 2025	December 31, 2024
Share capital	4,057	4,057
Share premium	681,237	681,237
Retained earnings of the current year	63,830	274,636
Retained earnings from previous years	278,625	13,179
Loss of previous years	-	(9,190)
Current year loss	-	-
TOTAL EQUITY	1,027,749	963,919

Description	Basic capital	Share premium and provisions	Undistributed earnings	Loss	Total
Balance as at January 1, 2024.	4,057	681,237	249,981	245,993	689,282
Effects of retroactive correction of material errors and changes in accounting policies	-	-	-	-	-
Corrected initial balance on 01.01.2024	4,057	681,237	249,981	245,993	689,282
Net changes in 2024.	-	-	37,834	(236,803)	274,637
Balance as at 31.12.2024.	4,057	681,237	287,815	9,190	963,919
Effects of retroactive correction of material errors and changes in accounting policies	-	-	-	-	-
Corrected initial balance on 01.01. in 2025	4,057	681,237	287,815	245,993	963,919
Net changes in 2025.	-	-	54,640	(9,190)	63,830
Balance as at 31.12.2025.	4,057	681,237	342,455	-	1,027,749

(All amounts are expressed in RSD 000, unless otherwise indicated)

14. Equity (continued)

Share capital

As of December 31, 2025, the paid-up subscribed share capital of the Company amounted to RSD 4,057 thousand (RSD 4,057 thousand as of December 31, 2024) thousand, consisting of 26,510,506 ordinary shares of RSD 0.153 each.

Share premium

As of December 31, 2025, reserves include the share premium generated by the capital increase related to the initial public offering of the Company's shares, the Premium segment of the Belgrade Stock Exchange. The share premium amounts to RSD 755,022 thousand (equivalent to RSD 499,847 per each new share issued by the Company). The value of the share premium is stated net of IPO-related expenses. IPO expenses amounted to RSD 73,785 thousand.

Retained earnings / (losses)

They consist of gains / (losses) of previous years. They also include net profit / (loss) for the current year.

15. Long-term and short-term loans from the parent and related entities

Loans from the parent and related legal entities in the amount of RSD 1,078,329 thousand as of 31 December 2025 (RSD 1,085,923 thousand as of 31 December 2024), mostly consist of revokable loans that shall be repaid to the owner Fintel Energia Group SpA. Long-term loans in the amount of EUR 9,162,747 are interest-bearing, the interest rate is from 3% to 6%. Other loans are interest-free. In the course of 2025, short-term, interest-free loans to the parent company were repaid, in the amount of EUR 28,600.

16. Operations liabilities

As of December 31, 2025, operating liabilities amounted to RSD 12,751 thousand, which is approximately the same level as in the previous year (RSD 34,119 thousand as of December 31, 2024). The largest part of these liabilities relates liabilities to suppliers in the country and the parent company abroad.

17. Other short-term liabilities

As of December 31, 2025, other short-term liabilities amounted to RSD 2,308 thousand, which represents an increase compared to the previous year, when they amounted to RSD 3,240 thousand. The largest part of these liabilities, in the amount of RSD 2,249 thousand, relates to VAT liabilities.

18. Passive time accruals

As of December 31, 2025, short-term accrued expenses amounted to RSD 320,253 thousand, an increase compared to the previous year, when they amounted to RSD 278,565 thousand. The largest part of these liabilities, amounting to RSD 317,266 thousand, relates to accrued interest on loans received from the parent company Fintel Energia Group SpA.

The remaining amount of RSD 2,987 thousand refers to reserved audit and consulting services costs related to the business year 2025, but for which invoices are expected to be issued in 2026.

(All amounts are expressed in RSD 000, unless otherwise indicated)

INCOME STATEMENT

19. Revenue from sales of products and services

Sales revenues for the twelve-month period ended December 31, 2025 amounted to RSD 52,422 thousand, while as of December 31, 2024 they amounted to RSD 13,938 thousand. Significant revenue growth in 2025 is the result of the introduction of re-invoicing of project management services (management fee), while in the previous year revenues arose exclusively from the provision of accounting services. In the current year, Fintel Group started intensive project development.

20. Salary costs

Salary expenses for the period of twelve months ended on December 31, 2025 and 2024 are presented in the following table:

	2025	2024
Salary costs and salary compensation	7,212	8,608
Costs of taxes and contributions on earnings and earnings compensation	1,093	1,304
Other personal expenses and fees	1,142	1,350
Total	9,447	11,262

21. Intangible costs

Intangible costs for the twelve-month period ended on December 31, 2025 amount to RSD 58,249 thousand, which represents a significant increase compared to the previous year, when on December 31, 2024 they amounted to RSD 19,543 thousand. These costs relate to bookkeeping services and services provided by the parent company under services agreement (invoices issued in accordance with the Consulting Services Agreement).

22. Financial income

Finance income for the twelve-month period ended 31 December 2025 and 2024 is presented in the following table:

	2025	2024
Financial income from relations with parent, subsidiary and other legal entities	119,830	330,551
Interest income	5	-
Positive exchange rate differences and positive effects of the currency clause	62	1,149
Total	119,897	331,700

Financial income for the period ending on December 31, 2025 is significantly lower compared to the same period last year. In 2025, the Company did not realize income based on dividends, but instead of dividends, part of the loans were returned by dependent legal entities. The lack of income before dividends had the greatest impact on the overall result, that is, on its decline.

(All amounts are expressed in RSD 000, unless otherwise indicated)

23. Financial expenses

Finance expenses for the twelve-month period ended 31 December 2025 and 2024 are presented in the following table:

	2025	2024
Financial expenses from relations with parent, subsidiary and other legal entities	45,100	43,930
Interest expenses	-	87

25. Basic earnings/(loss) per share

Basic earnings per share ranged from earnings of RSD 10.41 for the twelve-month period ended December 31, 2024 to earnings per share of RSD 2.41 for the period ended December 31, 2025. Basic earnings per share were calculated by dividing the Company's net result by the average number of shares of Fintel Energija (average number of shares is 26,511 thousand).

Diluted earnings per share equals basic earnings per share on both dates.

(All amounts are expressed in RSD 000, unless otherwise indicated)

26. Transactions with related parties

As previously indicated, the majority shareholder of the Company is Fintel Energia Group SpA.

Below is an overview of the Company's transactions with related parties in 2025 and 2024. All transactions with related parties were carried out on market terms.

As of December 31, 2025 and December 31, 2024, an overview of the amounts of receivables and liabilities arising from transactions with related parties is presented in the table below:

Key management compensation

The members of the Board of Directors were paid remuneration in the gross amount of RSD 1,365 thousand during 2025. Tiziano Giovannetti is the sole executive director of Fintel Energija AD Beograd and its subsidiaries.

27. Tax risk

The tax laws of the Republic of Serbia are often interpreted differently and are subject to frequent changes. The interpretation of tax laws by tax authorities in relation to the Company's transactions and activities may differ from the interpretation of management. As a result, transactions may be challenged by tax authorities and the Company may be assessed additional taxes, penalties and interest. The limitation period for tax liabilities is five years. This practically means that tax authorities have the right to determine the payment of outstanding liabilities within five years from the date the liability arose. Management estimated that the Group had paid all tax liabilities as of December 31, 2025.

(All amounts are expressed in RSD 000, unless otherwise indicated)

28. Events after the balance sheet date

There were no events occurring after the balance sheet date that would require adjustment to the financial statements as of December 31, 2025, or disclosure in the Notes to the Company's financial statements.

1. SUMMARY OF BUSINESS ACTIVITIES AND ORGANIZATIONAL STRUCTURE

Basic information

Business name: PRIVREDNO DRUŠTVO ZA PROIZVODNJU ELEKTRIČNE ENERGIJE FINTEL ENERGIJA AD BEOGRAD (ELECTRICITY PRODUCTION COMPANY FINTEL ENERGIJA AD BELGRADE)

Head office: Belgrade

Address: Masarikova Street No. 5

Registration number: 20305266

TIN: 105058839

Date of establishment: June 27, 2007

Authorized representative: Tiziano Giovannetti

Internet address: www.fintelenergija.rs

Prevailing business activity

Description and code of business activity: 3511 – Electricity production.

Business activities

Fintel Energija AD (hereinafter: the “Company” or “Fintel Energija”) and its subsidiaries (together: the “Fintel Group” or “Group”) are the leading independent producer of electricity from renewable sources in the Republic of Serbia. The Company and the Group are pioneers in the field of electricity production from renewable sources, having been the first in Serbia to build and operate wind farms. The sale of all produced energy is carried out through an arrangement (power purchase agreement) with JP Elektroprivreda Srbije (EPS), and there is no direct supply to end consumers.

Organizational structure and corporate governance

By harmonizing the bodies and acts with the Law on Business Companies (Official Gazette of the Republic of Serbia No. 36/2011, 99/2011, 83/2014-other laws and 5/2015, 95/2018, 91/2019 and 109/2021), the Company has the following internal organizational structure: Shareholders' Assembly (consisting of the sole shareholder Fintel Energia Group SpA) and the Board of Directors.

Purchase of own shares

There were no buybacks of own shares during the year of 2025.

Branch offices

The company does not have separate business units or branch offices.

1. SUMMARY OF BUSINESS ACTIVITIES AND ORGANIZATIONAL STRUCTURE (continued)

Subsidiaries

The Company operates as the parent company of the following affiliate legal entities:

- MK-Fintel Wind akcionarsko društvo Belgrade, registration number 20392126, where the Company owns 53.99737% of the share capital ("MK Fintel ad",), the remaining 46.00263% is owned by the company MK Holding d.o.o. za holding poslove Beograd.
- MK-Fintel Wind Holding d.o.o. for holding poslove Beograd, registration number 21280275, where the Company owns 53.99737% of the share capital ("MK Fintel d.o.o."), the remaining 46.00263% is owned by MK Green Energy Limited from Cyprus,

Financial indicators

Key indicators from the consolidated financial statements are detailed in the table below:

Ratios and key performance indicators	31.12.2025	31.12.2024
Revenues (thousand RSD)	2,774,370	2,765,433
EBITDA (thousand RSD) (Operating result + Depreciation)	2,095,616	2,022,522
Operating result (thousand RSD)	1,480,596	1,407,392
Net profit (thousand RSD)	822,514	546,578
Earnings per share	16,95	11.41
Cash flow from operating activities (thousand RSD)	1,590,944	1,671,539
Investments (thousand RSD)	1,260,942	854,708
EBITDA per turbine (thousand RSD)	83,825	80,901
Net profit per turbine (thousand RSD)	32,901	21,863

Revenues in 2025 amounted to RSD 2,774,370 thousand, while in 2024 they amounted to RSD 2,765,433 thousand, which represents a growth of approximately 0.96%. Revenues mostly refer to revenues from FIT wind farms.

EBITDA in 2025 amounted to RSD 2,095,616 thousand, while in 2024 it amounted to RSD 2,022,522 thousand, which represents a decrease of approximately 3.61%. Operating expenses in 2025 amounted to RSD 1,293,774 thousand, while in 2024 they amounted to RSD 1,358,042 thousand, which represents a decrease of approximately 4.97%.

The operating result in 2025 amounted to RSD 1,480,596 thousand, while in 2024 it amounted to RSD 1,407,392 thousand, which represents an increase of approximately 5.20%.

Net result (net profit) in 2025 amounted to RSD 822,514 thousand, compared to RSD 546,578 thousand in 2024, which represents an increase of 50.48%. This increase in net profit is mainly due to higher operating costs and financial expenses incurred due to loan repayment in 2024.

Employee structure

The Company's employees possess the appropriate qualifications, knowledge and experience necessary for the quality provision of the Company's services. In addition to the General Manager, the Company has 14 employees in subsidiaries who work on the maintenance of the existing wind farms.

3. ENVIRONMENTAL PROTECTION

Fintel Energija contributes to the protection of the environment mostly through investing in the construction of capacities to produce electricity from renewable sources (green energy). The construction of wind farms significantly reduces the emission of CO₂, one of the leading harmful factors for the environment.

4. SIGNIFICANT EVENTS AFTER THE END OF THE BUSINESS YEAR

There were no events that occurred after the balance sheet date that would require adjustments to the consolidated financial statements as of December 31, 2025, nor disclosures in the notes to the Group's financial statements.

5. PLANNED FUTURE DEVELOPMENT

Since September 2019, the Company has increased its wind power generation by 85.5 MW through the construction of three projects "Kula", "La Piccolina" and "Košava faza I". The Company also has development projects related to wind farms with a total installed capacity of approximately 1 GW. The list of projects is actively developing through the development and obtaining of appropriate regulatory approvals. All projects are developed in accordance with the phased approval process (gateway), so the dynamics of development depends on several internal and external factors. Among ongoing projects, the Torak Wind Farm project – project Kula 2 (10 MW project), the Vetropark Lipar - Kula 3 (10 MW) project, the Vetropark Lipar 2 project Kula 4 (10 MW) project and the Košava faza I - project are in the construction phase, are expected to start operation in the first half of 2027.

The growth of the Company's and the Group's business will primarily be driven by the expansion of ongoing projects related to wind farms, as well as solar power plants, with a total capacity of approximately 1 GW.

The Company's management expects to finance 70% of the investments from loans, while the remainder would be financed from subordinated debt or cash flows of the Company. Also, the Company's management intends to approach the development of wind farm projects in a flexible manner with the aim of achieving growth without jeopardizing the Company's ability to pay dividends in accordance with the Company's dividend policies. Although the Group is focused on organic growth, growth through acquisitions may also be considered on an opportunistic basis.

5. PLANNED FUTURE DEVELOPMENT (continued)

The Group's wind farms in operation and projects in the development/approval phase as of the date of the Annual Business Report are the following:

WIND FARM		LOCATION	DESIGN	OWNER	CAPACITY [MW]	STATUS
LA PICCOLINA	Wind	Vrsac	Energogreen doo	Energobalkan doo	6.6	In progress

TOTAL					594.8	

6. RESEARCH AND DEVELOPMENT

There are no research and development programs that are relevant to the Company's operations.

The Company has no registered patents or licenses.

The Company operates, monitors and controls its production facilities from a control centre based in Belgrade (the "Logistics Control Centre") 24 hours a day, 7 days a week. The Company has adopted a service delivery model whereby none of its facilities are continuously manned. The Company's facilities are operated by a team of 7 people, most of whom work remotely. The Company's personnel carry out a preventive maintenance programme and ongoing operational tasks according to a plan set centrally by the Logistics Control Centre via Vestas asset management software and respond to unplanned breakdowns. Remote monitoring is based on a generally accepted SCADA system that can be used across multiple production technologies. This allows the Company to monitor, in real time, the operation of the turbines and generators, including faults, breakdowns and any other problems that may arise. Wind turbines can be started and shut down remotely from the Logistics Control Centre, thus avoiding the need to engage a technician on site in the event of a minor breakdown.

7. OBJECTIVES AND POLICIES RELATED TO THE MANAGEMENT OF FINANCIAL RISKS, CREDIT RISKS, LIQUIDITY RISK AND MARKET RISK

Coordination and monitoring of key financial risks is carried out by the central treasury department of the parent company Fintel Energija, which provides guidelines for managing various types of risks and for the use of financial instruments. The main characteristics of the Fintel Group's risk management policy are:

- centrally setting operational risk management guidelines relating to market, liquidity and cash flow risks;
- monitoring achieved results;
- diversification of commitments/obligations and product portfolio.

C

Credit risk represents exposure to potential losses arising from the failure of business and financial counterparties to fulfil their contractual obligations.

The maximum credit risk exposure of the Group as of December 31, 2025, and 2024 is the book value of each class of assets, which is indicated in the following table:

RSD thousands	December 31, 2025	December 31, 2024
Cash and cash equivalents	1,184,730	453,776
Accounts receivable	205,445	180,993
Other receivables	82,819	84,550
Active time limits	288,319	384,310
TOTAL	1,761,313	1,103,629

7. OBJECTIVES AND POLICIES RELATED TO FINANCIAL RISK MANAGEMENT, CREDIT RISKS, LIQUIDITY RISK AND MARKET RISK (continued)

Credit risk (continued)

Account receivables mostly refer to receivables from EPS for energy produced in wind farms in December, and re-invoiced services for management fees.

Accruals mainly relate to claims from EPS for energy produced in wind farms in December, accruals of insurance costs and claims for interest from other related parties. Other receivables mostly relate to value added tax and receivables from employees.

These assets carry a low level of credit risk, as most of the above-mentioned claims are against a bank, the state or a state-owned company in Serbia.

There is no need to reduce the value of the above receivables.

Liquidity risk

Liquidity risk is related to the ability to meet obligations arising from financial commitments undertaken by the Group. Prudent management of liquidity risk during regular activities involves maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of term loan assets.

The Group manages liquidity risk centrally, as the administration department periodically monitors the Group's net cash/debt through the preparation of appropriate cash inflow and outflow reports. In this way, the Group aims to ensure adequate coverage for financing needs, by closely monitoring financing, open credit lines and their use, all with the aim of optimizing its resources and managing temporary liquidity surpluses.

The Group's objective is to establish a financing structure that, in line with its business objectives, guarantees sufficient liquidity for the Group, minimizes opportunity costs and maintains a balance in terms of maturity and debt composition.

The following table provides an analysis of the maturity of liabilities as of 31 December 2025 and 2024. The different maturities are determined based on the period between the reporting date and the contractual maturity of the Group's liabilities, gross of accrued interest as of 31 December. Interest is calculated in accordance with the contractual terms of the financing.

RSD thousand	December 31, 2025	
	Short-term maturity	Long-term maturity
Financial liabilities to shareholders	3,704	2,342,865
Liabilities for loans to banks	777,712	6,147,075
Liabilities to suppliers	138,067	-
Other obligations	833,982	-
Total	1,753,465	8,489,940

RSD thousand	December 31, 2024	
	Short-term maturity	Long-term maturity
Financial obligations to shareholders	15,794	2,623,398
Obligations for banks loans	898,733	5,659,362
Liabilities to suppliers	219,878	-
Other liabilities	837,151	-
Total	1,971,556	8,282,760

7. OBJECTIVES AND POLICIES RELATED TO FINANCIAL RISK MANAGEMENT, CREDIT RISKS, LIQUIDITY RISK AND MARKET RISK (continued)

Liquidity risk (continued)

The analysis of financial liabilities by maturity shows an increase in liabilities maturing within one year as of December 31, 2025, compared to those as of December 31, 2024.

Accordingly, given the fact that the shareholders have confirmed that they do not intend to seek repayment of the loan before the end of 2027, as well as the presence of liquid assets (including financial assets) and by obtaining a full feed-in tariff from 2020 for all wind farms, it is believed that the Company and the Group shall be able to meet their obligations in the foreseeable future.

Market risk

In conducting its business, the Group is potentially exposed to the following market risks:

- the risk of exchange rate fluctuations;
- the risk of interest rate fluctuations.

These risks are essentially centrally managed by the parent company Fintel Energija.

Risk of exchange rate fluctuations

Foreign exchange risk is associated with operations in currencies other than RSD. Fintel Group is exposed to foreign exchange rate fluctuations, as it conducts business in Serbia through its subsidiaries, which are companies dedicated to the study, construction, development and management of wind farms and other renewable energy projects. The Group has loans denominated in foreign currencies, mainly in EUR and RSD, which exposes the Company to foreign exchange rate risk. Foreign exchange rate exposure arising from foreign currency loans is managed by having loans denominated in the functional currency of the Group in the total loan portfolio.

As of December 31, 2025, if the RSD currency had strengthened / weakened by 5% against the EUR and all other variables remained constant, the result after tax would have amounted to RSD 394,033 thousand (2024: RSD 390,855) more / less, mainly as a result of positive and negative exchange rate differences due to the exchange rate of liabilities denominated in EUR.

Risk of interest rate fluctuations

The risk of interest rate fluctuations to which Fintel Group is exposed originates from financial obligations. Fixed interest rate debt exposes the Group to the risk of changes in the fair value of the debt depending on changes in market reference rates, while variable interest rate debt exposes the Group to cash flow risk due to interest rate volatility. The Group's financial indebtedness consists of current bank liabilities and medium- and long-term loans approved by banks. Given that the hedging instrument (interest rate SWAP) that previously reduced exposure to the risk of interest rate changes ceased to be valid in 2024, the Group is now more exposed to the risk of fluctuating interest rates. Exposure to interest rate changes is greater due to the growth of EURIBOR and the global geopolitical situation. For this reason, the Group performed an analysis of how much interest rate fluctuations due to EURIBOR growth by 10% would affect the growth of interest costs on an annual basis. If EURIBOR were to increase by 10%, the interest expense would increase by EUR 120,941.

7. OBJECTIVES AND POLICIES RELATED TO FINANCIAL RISK MANAGEMENT, CREDIT RISKS, LIQUIDITY RISK AND MARKET RISK (continued)

Capital management risk

The Group's objective in managing capital risk is to preserve business continuity to guarantee returns to shareholders and benefits to other interested parties. Furthermore, the Group aims to maintain an optimal capital structure to reduce borrowing costs.

The Group monitors its capital based on the ratio of net debt to net invested capital (gearing ratio). Net debt is calculated as total debt, including current and long-term loans and borrowings, plus net exposure to banks. Net invested capital is calculated as the sum of total capital and net debt.

The debt ratio as of December 31, 2025, and 2024 is presented in the following table:

RSD thousands	December 31, 2025	December 31, 2023
Long-term financial liabilities:		
- Financial liabilities to shareholders and other related parties	2,342,865	2,623,398
- Liabilities for loans from banks	6,147,075	5,659,362
Short-term financial liabilities:		
- Liabilities for loans from banks	777,712	608,956
- Financial liabilities to shareholders and other related parties	16,646	305,571
Financial resources	(337,772)	(337,003)

8. CORPORATE GOVERNANCE REPORT

Statement on the implementation of the corporate governance code

Pursuant to Article 368 of the Law on Companies ("Official Gazette of the Republic of Serbia", No. 36/2011, 99/2011, 83/2014 - other laws, 5/2015, 44/2018, 95/2018 and 91/2019), the company Fintel Energija ad Beograd declares that it applies the Corporate Governance Code, which is available on the company's website www.fintelenergija.rs. The Corporate Governance Code contains a summary of the corporate governance practices applied by the Company.

The Company's Corporate Governance Code sets out the principles of corporate practice and organizational culture in accordance with which the holders of corporate governance of the Company behave, and especially in relation to the rights of shareholders, the obligations and responsibilities of the Company's management, the role of stakeholders in corporate governance and data disclosure obligations and transparency of the Company.

Internal control system and risk reduction related to financial reporting

The system of internal controls and supervision consists of all measures and methods applied in the Company to secure its assets, improve the accuracy and reliability of accounting and operational data, reduce risks related to financial reporting, and comply with procedures, standards, laws and regulations.

The regulatory framework for the work of the internal supervision and internal audit sector is aligned with the Law on Business Companies ("Official Gazette of the Republic of Serbia", No. 36/2011, 99/2011, 83/2014 - other laws, 5/2015, 44/2018, 95/2018 91/2019 and 109/2021). Standards for the Professional Practice of Internal Auditing and other legal and professional regulations.

Internal oversight and internal control tasks include:

- ✓ Control of compliance of the Company's operations with the law, other regulations and Company acts;
- ✓ Supervision of the implementation of accounting policies and financial reporting;
- ✓ Verification of the implementation of risk management policies;
- ✓ Monitoring compliance of the Company's organization and operations with the corporate governance code;
- ✓ Evaluating policies and processes in the Company, as well as proposing their improvement.

The company hires at least one person responsible for internal business oversight, and he or she must meet the requirements prescribed for an internal auditor in accordance with the law governing accounting and auditing.

The person in charge of internal supervision is under the obligation to report on the conducted supervision of operations to the audit committee, or the board of directors.

8. CORPORATE GOVERNANCE REPORT (continued)

Internal control system and risk mitigation related to financial reporting (Continued)

Audit Committee:

- ✓ Prepares, proposes and checks the implementation of accounting policies and risk management policies;
- ✓ Makes proposals to the Board of Directors for the appointment and dismissal of persons responsible for performing the internal oversight function in the Company;
- ✓ Supervises the work of internal supervision in the Company;
- ✓ Examines the application of accounting standards in the preparation of financial statements and evaluates the content of financial statements;
- ✓ Examines the fulfilment of the requirements for the preparation of the Company's consolidated financial statements;
- ✓ Conducts the procedure for selecting the Company's auditor and proposes a candidate for the Company's auditor, with an opinion on his/her expertise and independence in relation to the Company,
- ✓ Gives an opinion on the proposed contract with the Company's auditor and, if necessary, provides a reasoned proposal for termination of the contract with the Company's auditor;
- ✓ It oversees the audit process, including determining key issues to be audited and verifying the independence and objectivity of the auditor.

External auditor

The Company's annual financial statements are subject to external audit.

In accordance with the law and the Company's statute, the Company's Shareholders' Meeting decides on the selection of the auditor and the remuneration for his work, with all mandatory elements prescribed by law.

The auditor's reports on the audit of the financial statements and consolidated financial statements of the Company for 2024 were adopted at the regular session of the Company's Shareholders' Meeting on June 10, 2025. At the same session, the Company's Shareholders' Meeting elected the audit company Ernst & Young d.o.o. Beograd.

Company management bodies

The management of the Company is organized as a unicameral body. The bodies of the Company are as follows:

- ✓ Shareholders' meeting;
- ✓ Board of Directors.

The Company's Statute defines the scope of work of the Shareholders' Meeting and the Board of Directors.

Board of Directors

The members of the Board of Directors are:

- ✓ Claudio Nardone, President
- ✓ Tiziano Giovannetti
- ✓ Giulio Moreno
- ✓ Tamara Mlađenovic

Board of Directors (Continued)

Activities of the board of directors in 2025

During 2025, the Board of Directors performed its duties in accordance with applicable regulations, with the optimal number, composition and qualifications of its members. The agenda of the Board of Directors included regular activities related to the approval of the Company's consolidated and individual financial statements, convening regular and extraordinary meetings of the Shareholders' Assembly, and reviewing the results of key business indicators.

No non-compliances or irregularities were observed in the Company's operations during 2025. Based on the information available to the Board of Directors, the Company's operations are fully compliant with the law, other positive regulations and internal acts of the Company.

Shareholders' meeting

The Rules of Procedure of the Shareholders' Assembly regulate and determine in more detail the manner of work and decision-making of the Shareholders' Assembly. The provisions of these Rules of Procedure apply to and are binding on all persons participating in or attending the work of the Assembly.

The Assembly is composed of all shareholders of the Company. In order to personally participate in the work of the Assembly, a shareholder must own at least 0.1% of the total number of shares of the relevant class. Shareholders who individually do not own 0.1% of the total number of shares have the right to participate in the work of the Assembly through a common proxy.

Activities of the Shareholders' Meeting in 2025

During 2025, three sessions of the Shareholders' Assembly were held. At the regular session, the Shareholders' Assembly discussed and adopted the annual financial statements and consolidated financial statements of the Company, the independent auditor's reports on the audit of the financial statements, the report on the remuneration policy of the members of the Board of Directors, and made a decision on the election of the auditor for 2025. At the extraordinary session, the Shareholders' Assembly discussed and decided on returning the additional payments of the founders that do not increase the Company's share capital.
